Chicago
U. S. A.

Our Tenth Annual Want Book

Is quite a departure from all preceding issues. It is larger, has more pages, and contains a vast amount of information useful to every hardware dealer.

In addition to printing all the changes in lists, we have illustrated almost all the new goods in Hardware and Cutlery which have been added to stock since the publication of our last general catalogue, January, 1899.

All matter is arranged according to corresponding pages in our catalogue, making it exceedingly easy to refer from one book to the other without consulting an index.

Our No. 6 general catalogue, made doubly valuable by the changes noted herein, will be sent to every dealer who receives this book, should he be without one. Do not fail to write or to include a copy in your next order.

The changes and additions that have been made in Sewing Machines, Typewriters, Guns, Sporting Goods, Fishing Tackle, Bicycles and Bicycle Sundries, are included in separate catalogues of these lines, which we issue each year. We call attention to our complete line of Paints, Oils, Varnishes, Brushes and Painters' Supplies, also included in a large special catalogue.

We hope that our Want Book will find favor in the hands of our many friends, and that they will use it for their daily memoranda. A complimentary order for goods selected by the aid of this book will be greatly appreciated.

AUGER BIT FILES.

For Auger Bits of All Sizes.

No. 1-7 in., double ender, one end having flat file with smooth edges, the other end being smooth with file edges, one dozen on an easel back card, per dozen \$3.50

This file is made especially for the purpose, and will do quick and fine work without the danger of ruining the lip.

114

FORD AUGER BITS.

Extra Cast Steel, Single Concave Twist, Extension Lip.

Inches,	4/	5/	6/	7/	8/	9/	10/16ths
Per dozen,	\$3.00	3.40	3.80	4.40	4.80	5.20	5.60

Inches,	11/	12/	13/	14/	15/	16/16ths
Per dozen,	\$6.10	6.60	7.20	7.80	8.40	9.00

Sets of 32½ quarters, one each 4/, 5/, 6/, 7/, 8/, 9/, 10/, 11/, 12/, 13/, 14/, 15/ and 16/16ths in., in fancy cherry wood box, with hinged cover, - per set \$6.25

The peculiar twist gives it a single cutting edge and a single projecting lip. The thread of the screw point is a continuation of the twist of the upper part, so that one merges into the other. The concave shape of the upper surface of the twist has the effect of drawing the borings toward the center or axis of the bit, thus preventing friction of borings against the sides of the hole, and thereby also preventing choking. For this bit, the necessity of constantly withdrawing for removing the chips does not exist.

117

SNELL'S SHIP AUGERS.

32/16ths - - - - - new list \$38.00

129

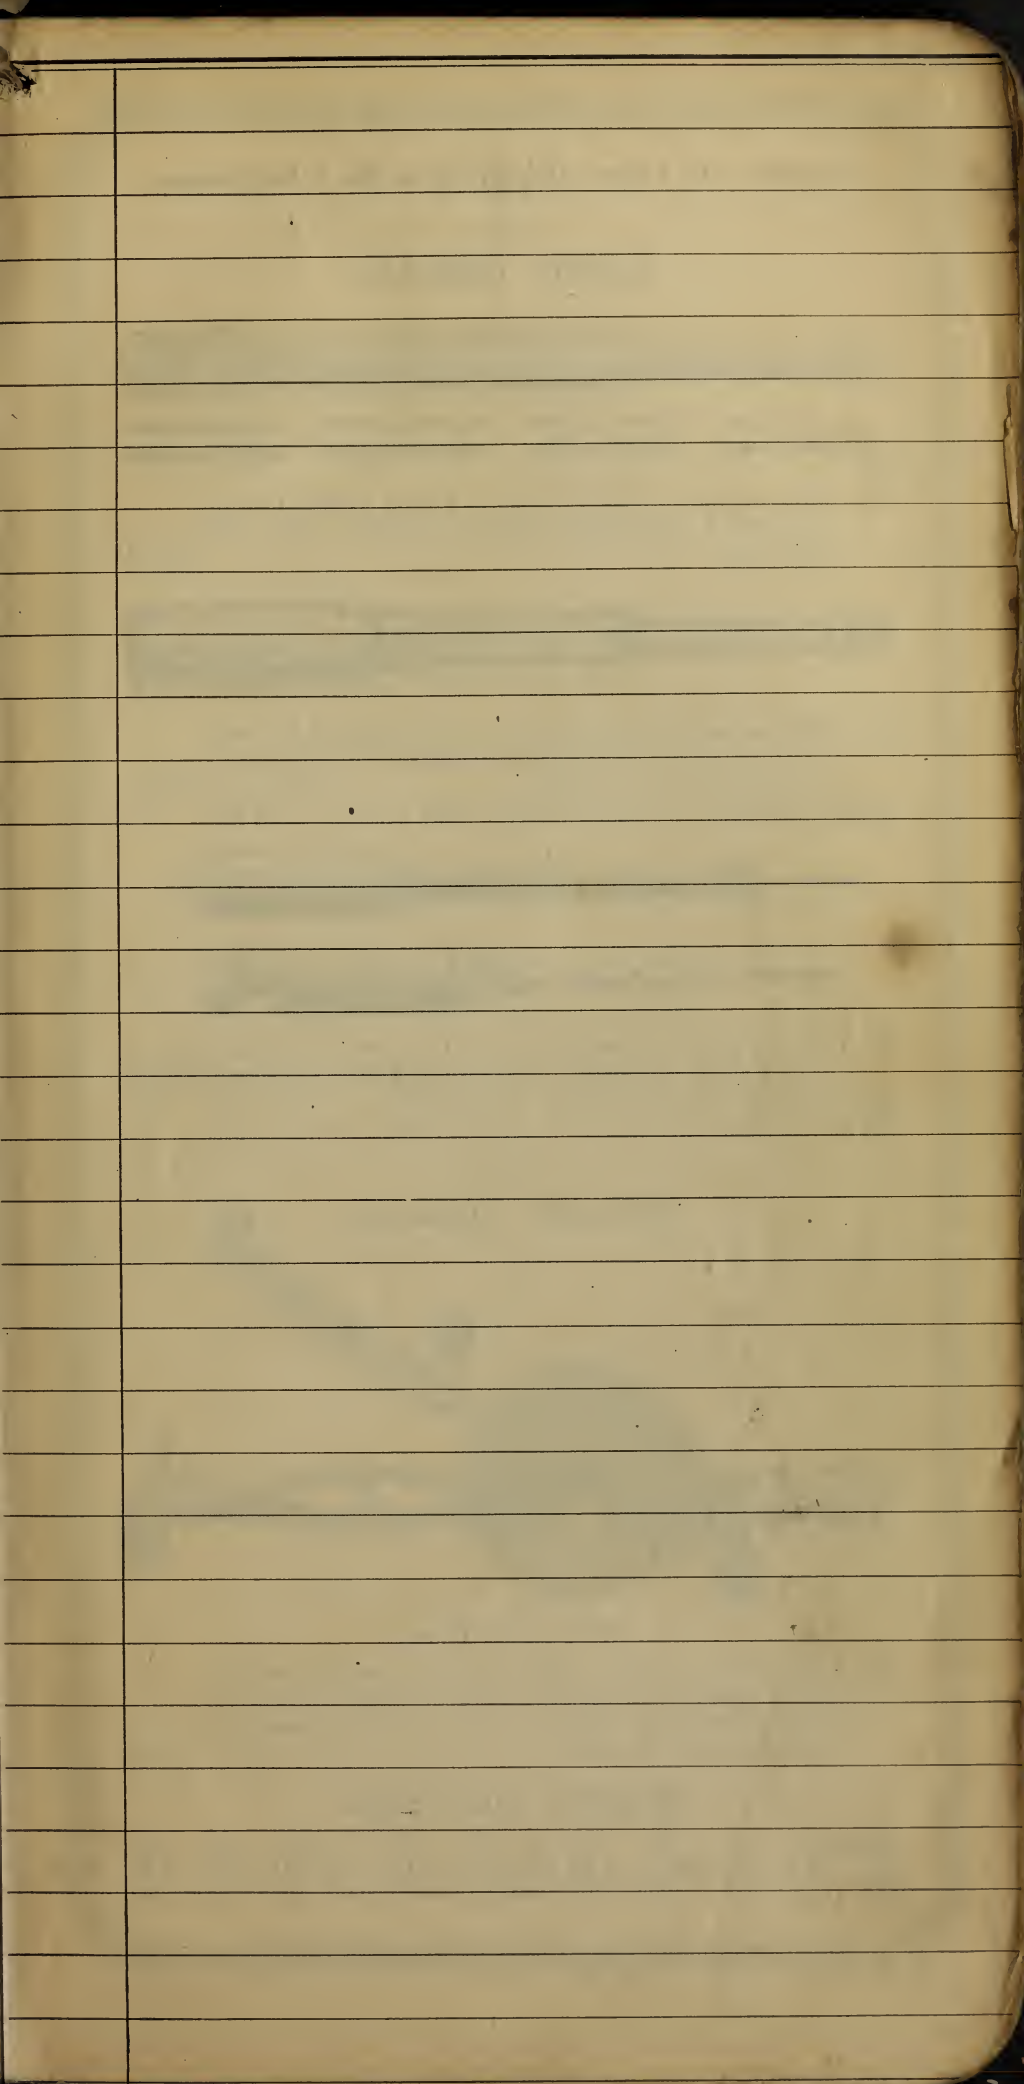

ANGULAR BORERS.

No. 35-Miller's Falls, japped frame, improved nickel plated chuck, adjustable to any angle, with set screw, - - - - - per dozen \$24.00

This is a very serviceable tool. It can be attached to any brace, and will serve as an extension as well as an angular borer. The adjusting device is very simple, strong, and efficient.

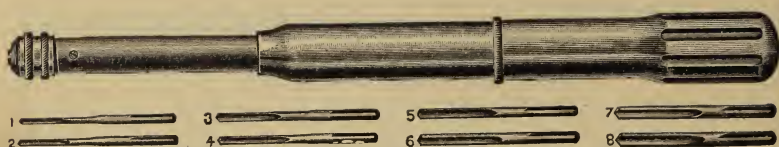

Please note that cuts of Barber's Pattern Braces are transposed.

134

YANKEE SPIRAL RATCHET SCREW DRIVERS.

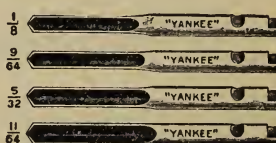

Right or Left Hand Ratchet, or Rigid at Variable Lengths.

No. 30-Nickel plated, stained cherry handle, length with bit 11 in., extended 19¼ in., 3 forged steel bits, per dozen \$30.00

The change from right to left hand for either push or ratchet is made by simply moving the slide to either end of the slot. The ratchet movement can be used in any part of the length of tool for either right or left hand. When slide is placed in center of slot, the rod is held rigidly and tool can be used as an ordinary screw driver, and this at any point in length of rod. When extended, this gives a very long screw driver.

Neither pawls nor ratchets can bend, break or get out of order. The friction in ratchet mechanism is so slight as to be hardly felt, the backward movement is as easy as a good "stem winder," and quite as noiseless.

YANKEE CHUCKS AND DRILLS.

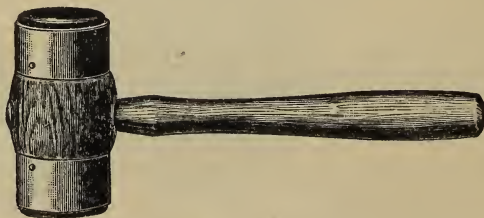

For use with No. 30 Yankee Spiral Screw Drivers.

No. 30-Steel chuck, with spring lock, complete with 8 cast steel drill points, per dozen sets \$12.00

Extra Drills, sizes 4, 5, 6, 7, 8, 9, 10 or 11-64ths, per dozen 1.10

135

FIBRE HEAD MALLET.

No. 64-14 in. blacksmiths' shoeing pincers,	-	"	28.80

150

In ordering Vises, be particular to give both number and style as the same numbers are used by different makers.

151

TRENTON FORGED ANVILS.

Forged in Two Pieces and Welded at the Waist, Face One Piece of Special Grade Finest Tool Steel, Tempered to Prevent Chipping.

Sizes, 80, 85, 90, 95, 100, 110, 115, 120, 125, 135, 140 and 150 lbs., - - - - - per pound \$0.15

Recent improvements in the design enables us to offer to the trade an Anvil very much superior in shape to any that has ever been put upon the market. Some of the features of special note are:

A long, perfectly shaped horn and long heel. A base that has a long spread, thus preventing "tipping" when heavy work is being done on the point of heel or horn. A base that does not require "strapping down," will set "firm" without "shifting" or "rocking" and combines a most practical and graceful shape with the least amount of weight attainable. An Anvil that, combined with the best material and workmanship, stands unequalled for superior shape, graceful design, stability on the block, and the absence of superfluous weight in the base.

154

ALLIGATOR WRENCHES.

159

Please note that cut of No. 2 Disston's Plastering Trowels, is incorrect, the shank being more like the American.

160

NEW ROGERS SCROLL SAWS.

The latest improvements on this saw are Pratt's rubber positive blower and a new clamp for holding the saw blades. All parts made to interchange. The bearings to the arms are carefully sized to bring them in perfect line, a vital point in the construction of any jig saw. Each machine is provided with a dust blower, which is a very great advantage.

With Pratt's Rubber Positive Blower.

No. 1—New Rogers, japanned iron frame, striped in red and gold, japanned tilting-table, selected ash arms and pitman, steel arbors, carefully fitted to bearings, $4\frac{1}{2}$ in. iron balance wheel, with drilling attachment, improved saw clamps, height of table 32 in., weight 25 lbs., complete with 1 dozen saw blades, wrench, sheet of designs and drill points, - - - each \$3.50

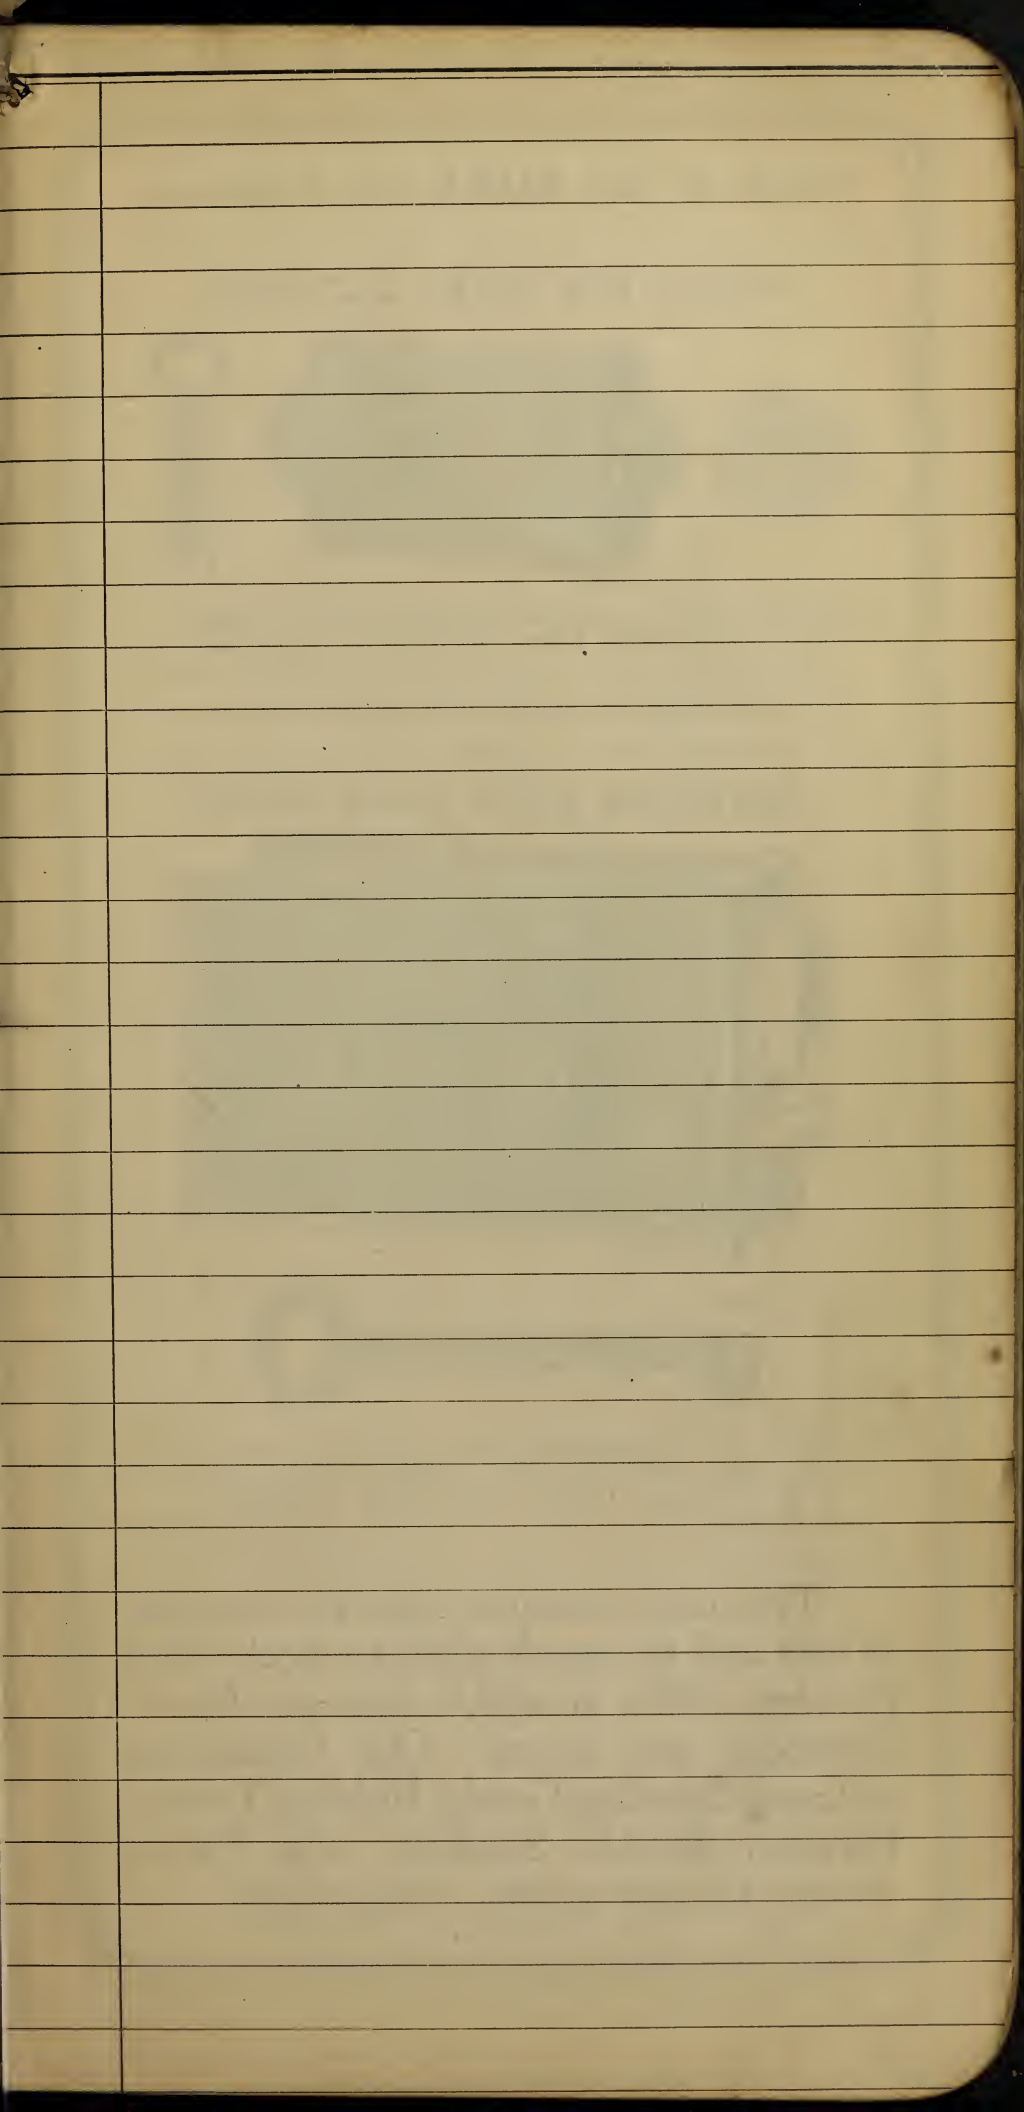

CIRCULAR SAWS.

Hand Circular Rip Saws, - - - new list \$40.00

165

Change Nos. 106S and 116S Climber Straps to read "per dozen sets of four," list \$20.00.

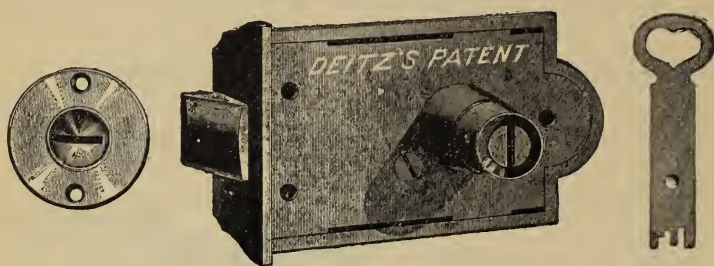

"Our Very Best" is a trade mark which we use only on goods of the very best quality. For more than a quarter of a century we have maintained the quality of every article so branded.

AUTOMATIC DOOR HOLDERS.

No. 5-Japanned, with screw, swings on contact with door and holds it open, prevents slamming, per dozen \$1.25

343

BIGELOW AUTOMATIC DOOR BELLS.

No. 50-4 in., nickel plated bell, old copper finish push button, - - - per dozen \$18.00
 No. 51-4 in., old copper bell, with push button to match, per dozen - - - 18.00

This bell gives a good electric ring, sounding repeatedly when the button is pressed and after being released. The bell is adjustable to doors of any thickness and casings up to 12 inches by cutting the extra connecting wire the required length.

348

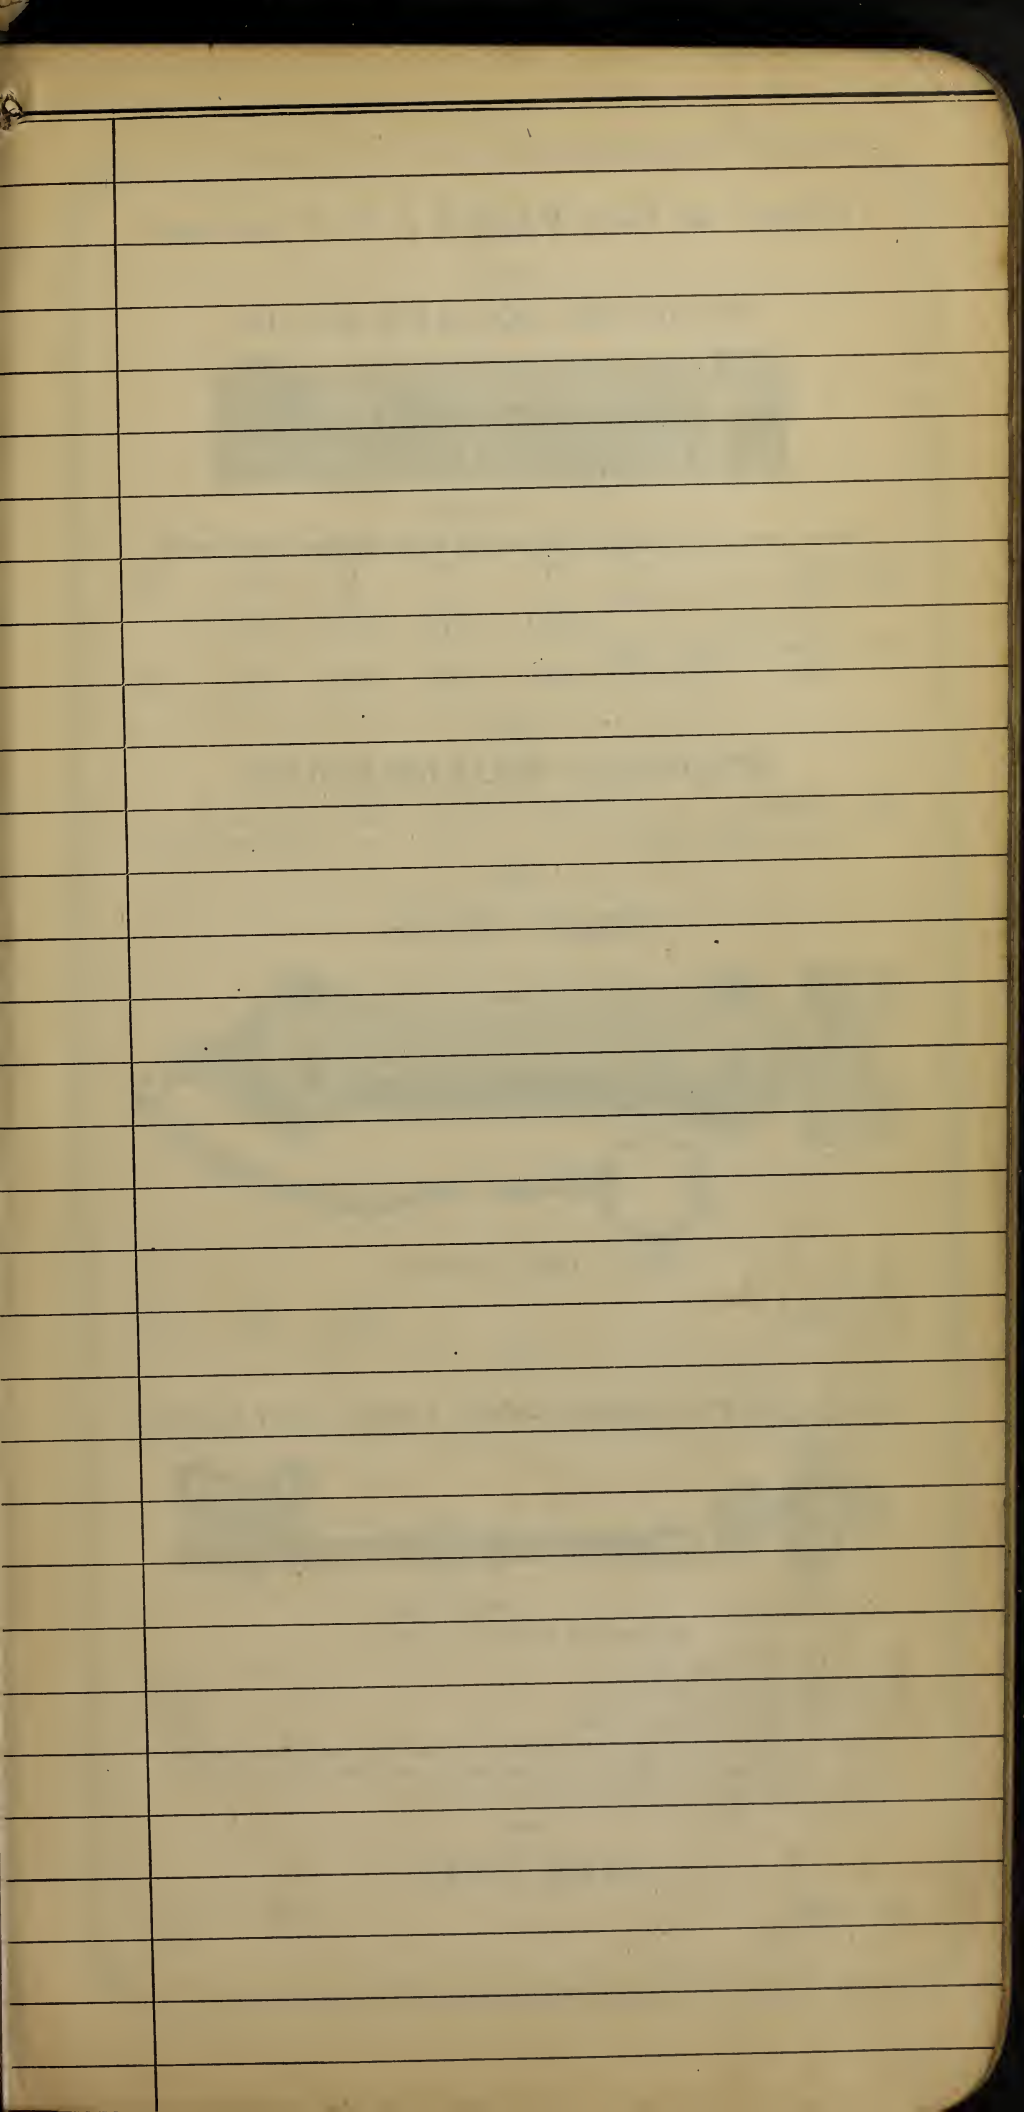

STAR SCREEN DOOR CATCHES AND PULLS.

This latch is made expressly for screen doors and does not require mortising, a screw driver being the only tool required to put it on. The latch and pull are both secured to the outside of door, at any convenient point. The latch bolt has a double bevel and holds the door only by the spring. A slight pressure will throw the bolt, but the spring is sufficient to hold the door against the wind. It also prevents the door from rebounding after striking, and in the case of weak hinges will insure the door being always closed.

No. 312-Japanned, with screws, - - - per dozen \$3.00

Nowhere can you get better Mixed Paints than "Our Very Best." We carry a full line of Paints and Varnishes.

376—Continued.

EASY DOUBLE ACTION SPRING HINGES.

Hinge or Blank as shown on door. Sectional view showing interior mechanism.

Can be fitted to any swing door, and provides a simple and efficient construction which permits the door being readily hung and taken down. This is of itself a great feature, as one man can handle and fit the door. The hinge is readily detached and each part put on separately and then coupled together, the door being centered by the screws under the cover plate after it is hung. Tension of the spring is adjusted by screw in end of center plate, governing the swing of door and relieving screws from all strain. No swinging back and forth of the door, as the peculiar construction of this hinge is such that it equalizes the pressure at all points, permitting door to return to its initial point slowly and easily, which is a radical departure from any hinge ever constructed. After once adjusting the door is always in line. No unsightly springs; all parts concealed; no sagging of the door, whether tight or loose, as the hinge swings upon a fixed pintle. Blanks present the same appearance as the regular hinges.

RELIANCE DOOR SPRINGS.

Japanned, Extra Quality Blued Spring.

No. 270 - 8 in., medium,	- - -	per dozen	\$2.25
No. 271½-10 in., heavy,	- - -	"	3.50

BLUM DOOR SPRINGS AND CHECKS.

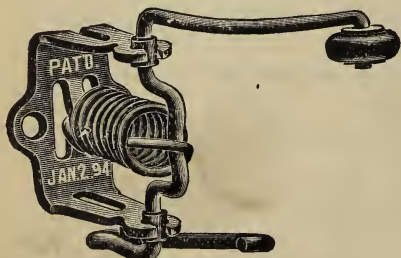

These are strong, durable, and neat in appearance, and can be applied in a few minutes by any one. There is no slamming, although unlike spring hinges and other appliances for closing screen doors, the tension is stiffer as the door closes, due to the system of levers. The door is always closed tight but can be opened as easily as if there were no spring or check.

For Right and Left Hand Screen or Light Doors.

No. 20-Japanned steel, brass cylinder, adjustable tension,	- - -	per dozen	\$10.00
No. 21-Bronzed steel, brass cylinder, adjustable tension,	- - -	per dozen	12.00

AUTOMATIC DOOR CATCHES.

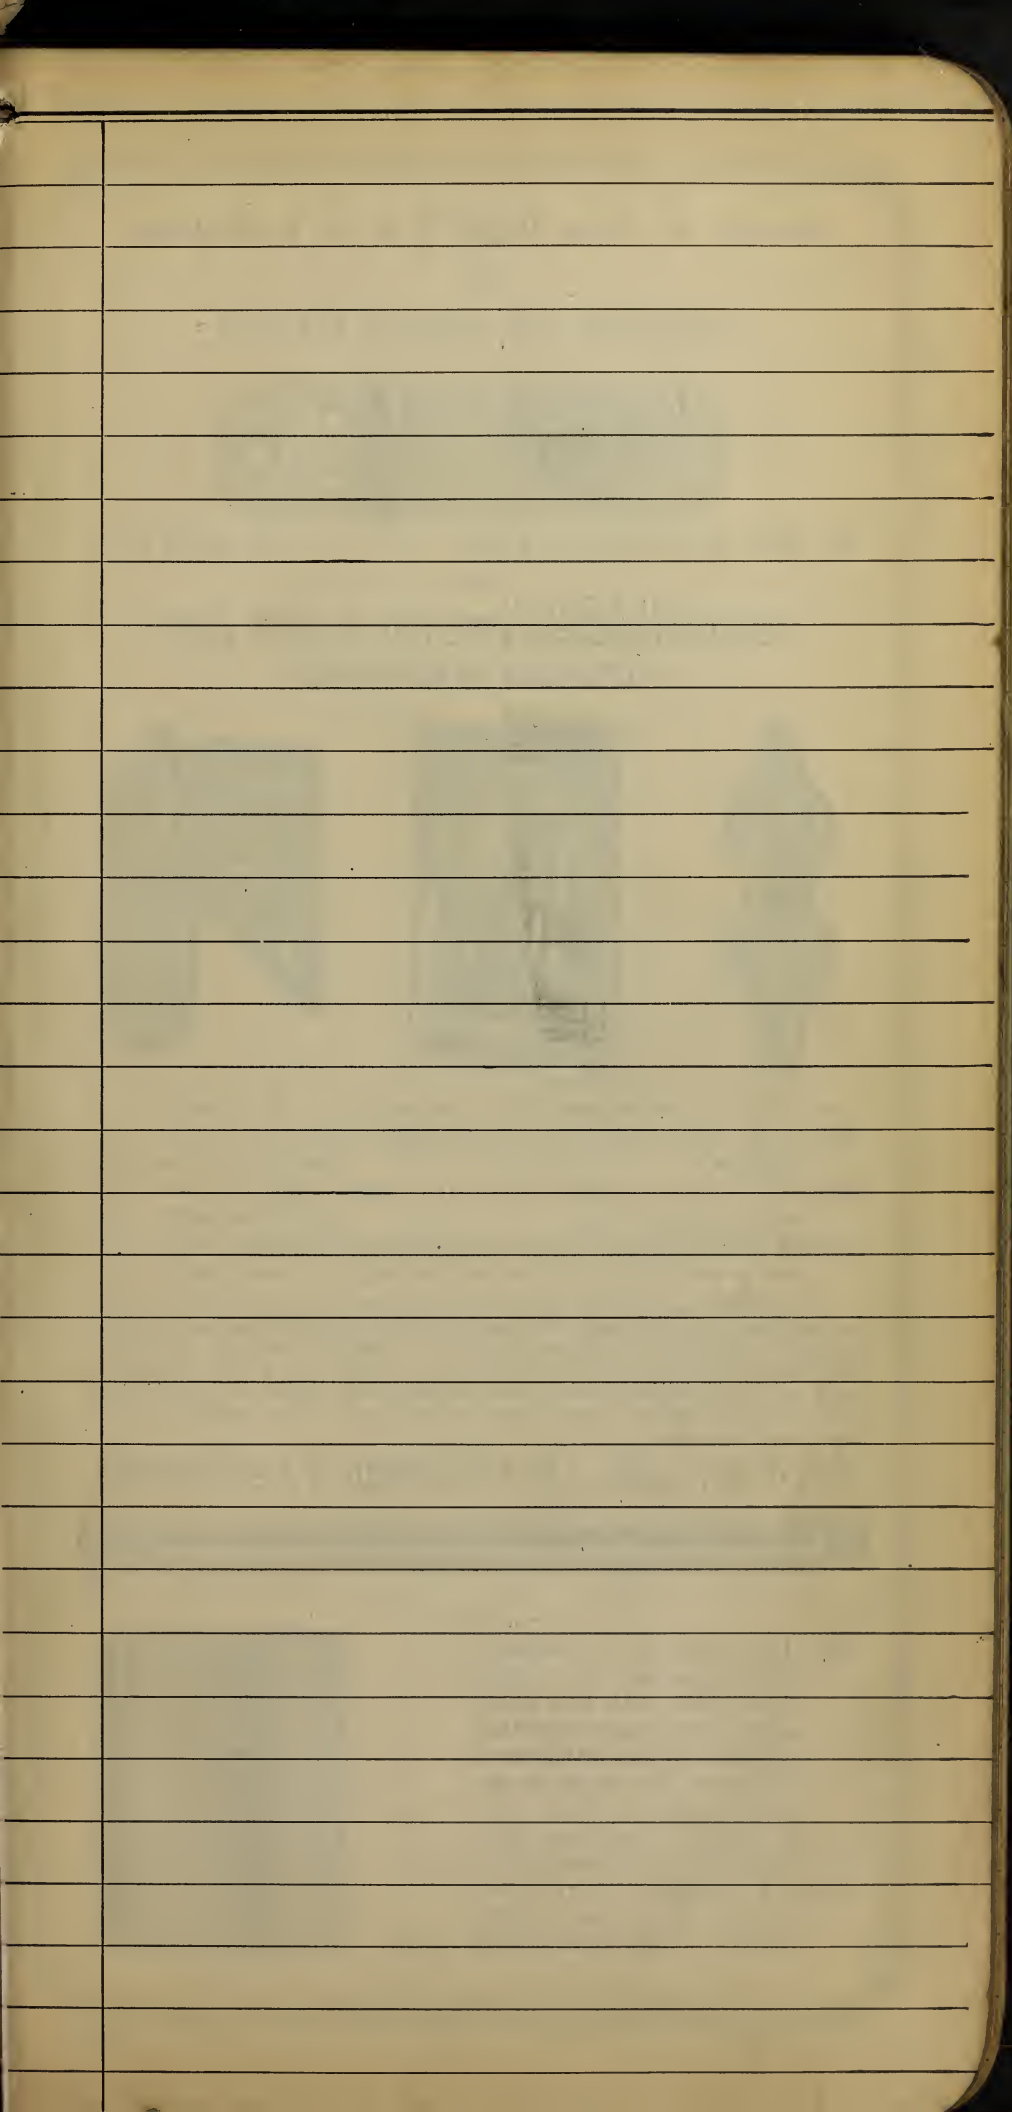

Are applied on the door casing at the opening side of the door and can be placed anywhere along on the casing where it is necessary to bring a pressure on the door to force it closed.

It is a well-known fact that all screen doors will warp or spring out at the upper or lower corner at the opening side, after being hung a short time, and there is no spring made strong enough that is applied

at the hinge side of the door that will force the screen door closed when so warped. This catch remains open until the lower projection shown in cut is struck by the door, releasing the spring and throwing the rubber roller against the outside of door. Do not hinder the opening of door and are reversible.

No. O-Japanned steel, rubber roller, with door plate,	- - -	per dozen	\$2.40

"UP-TO-DATE" GATE HINGES AND LATCHES.

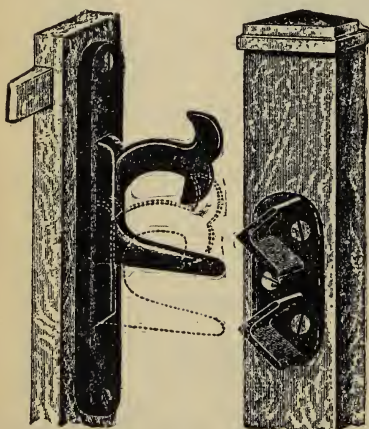

Malleable Iron, Screw Shanks.

No. 1-For lawn gates,	- - -	per dozen sets	\$12.00
No. 2-For farm gates,	- - -	"	21.00

These fastenings are very simple and effective. There are no springs and the locking is automatic.

GATE LATCHES.

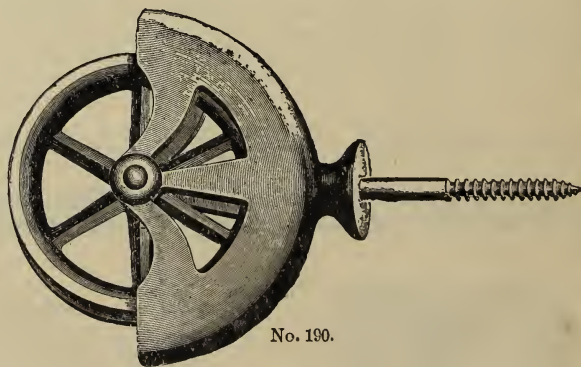

The latch is attached to a sliding carriage which adjusts itself by means of the projection shown in the illustration. As this point comes in contact with the strike, it is raised or lowered by the angle of the strike. so that any change of position due to the weather or general sag of the gate will not affect the closing of gate. Sliding the latch up and down in the frame will not interfere with its proper action. It is claimed to be absolutely hog-proof.

No. 6-"G. P." malleable iron, japanned, self adjusting,	- - -	per dozen	\$3.00

PROUTY NOISELESS PARLOR DOOR HANGERS.

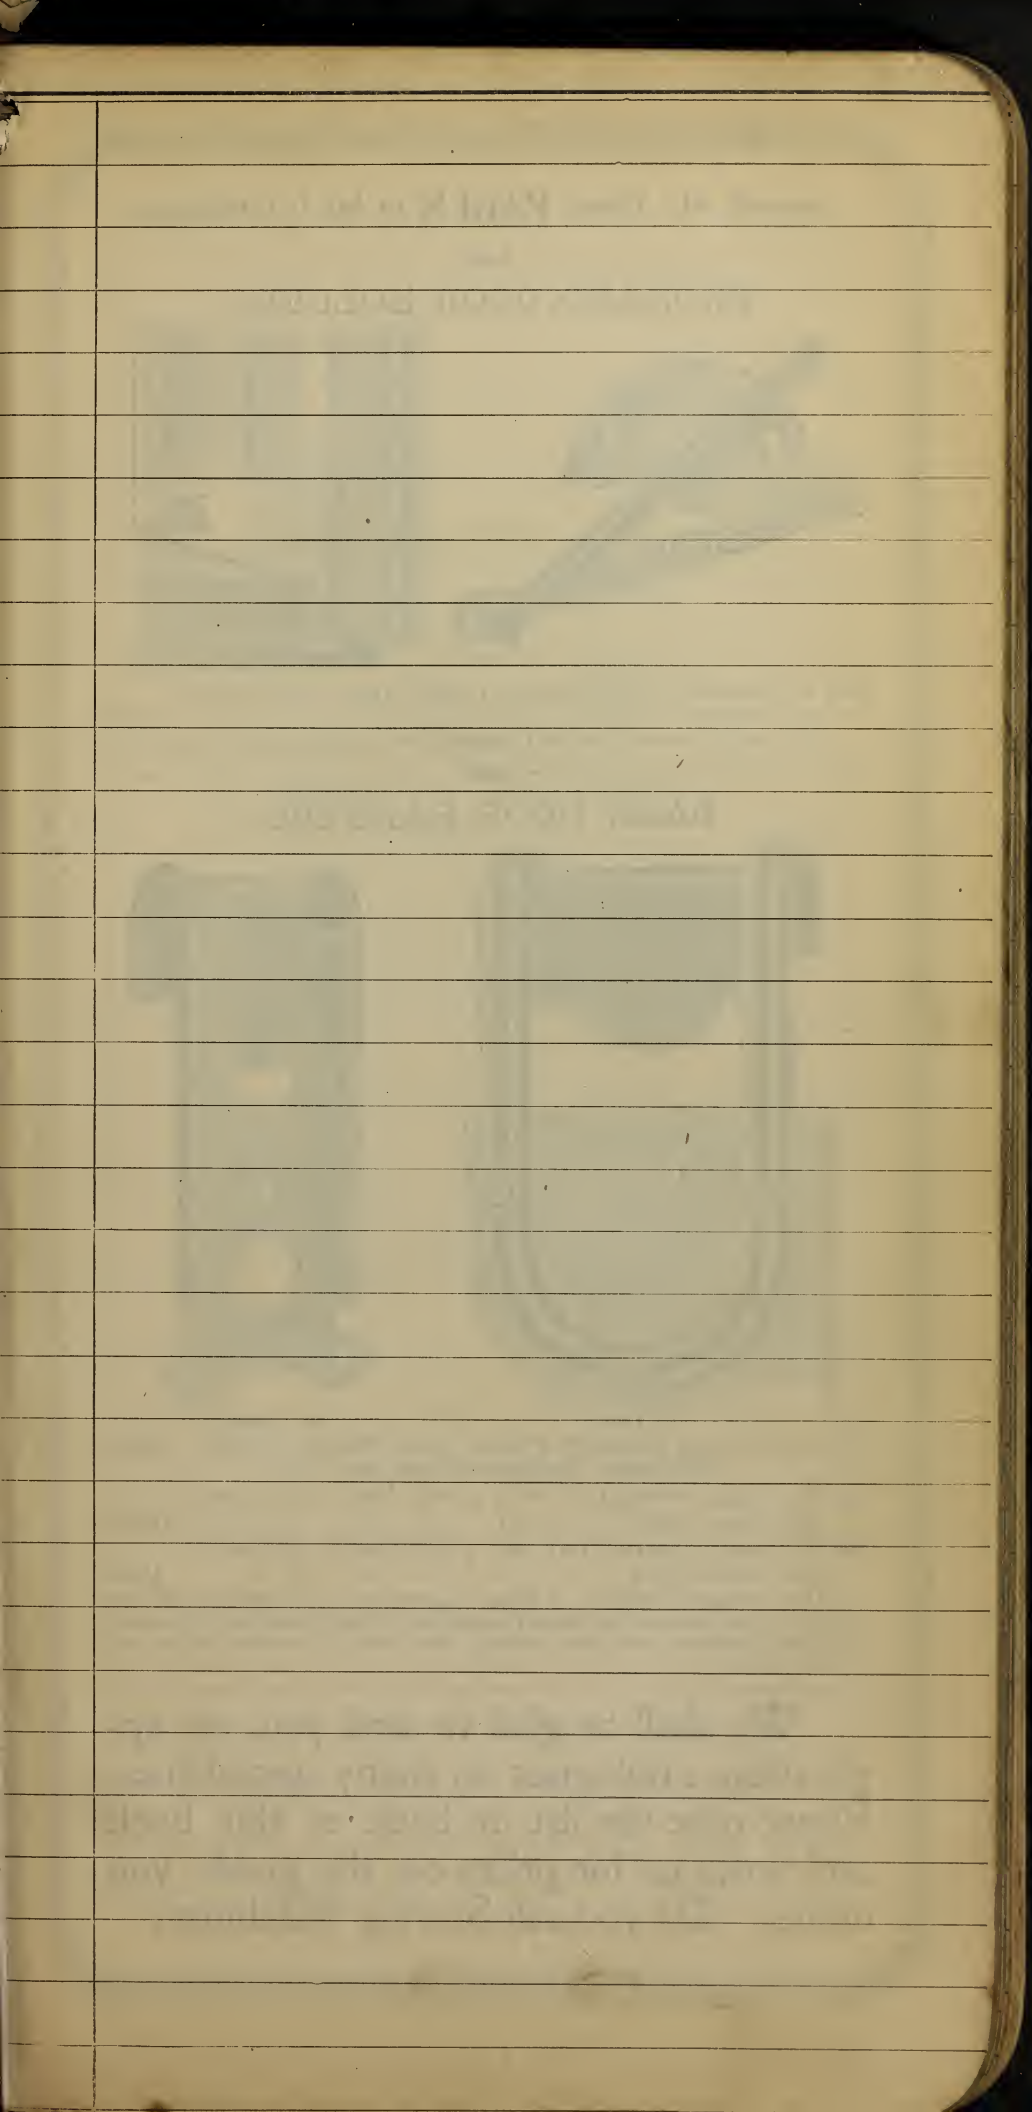

All Steel, Roller Bearings, Fiber Tread.

No. 200—Full set for double doors, - -	per set \$6.00
No. 210—Half set for single door, - -	" 3.00

The wheels are fitted with the double row roller bearings; all wearing parts hardened; roller cups ground out; fiber tread; extra wide "U" shaped treadway, fitting round top of rail. Packed with the screws and track in 8 ft. and 14 ft. bundles, wrapped in express paper. The adjustments are detachable from top of door instantly; can be adjusted and securely locked without screw driver or wrench; can be placed in position without mortising or cutting door in any way. The floor guides are something entirely new, consisting of a rubber-covered roller to be set on each side of the door, just back of the casing—no mortising bottom of door; no binding of the guide; no noise.

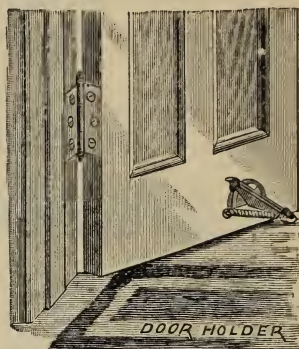

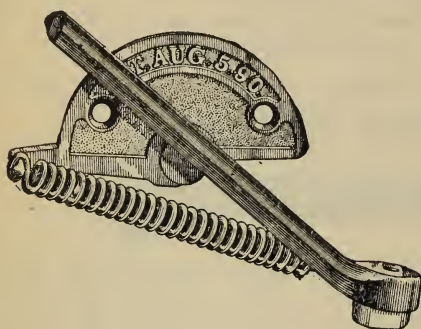

This book contains only the new goods
in Hardware and Cutlery, pages 1 to 1272.
We issue separate catalogues of the balance.

396

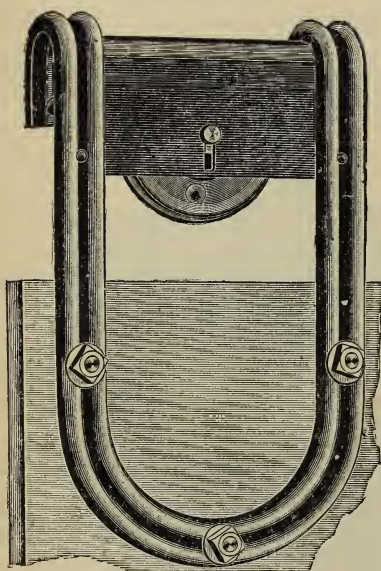

BROHARD DOOR HOLDERS.

No. 1—Enameled, steel spring, rubber foot, with screws,
per dozen - - - - - \$3.00
It is not necessary to stoop to work them—simply use your foot.

399

BARN DOOR HANGERS.

No. 9 King.

No. 7 Prouty.

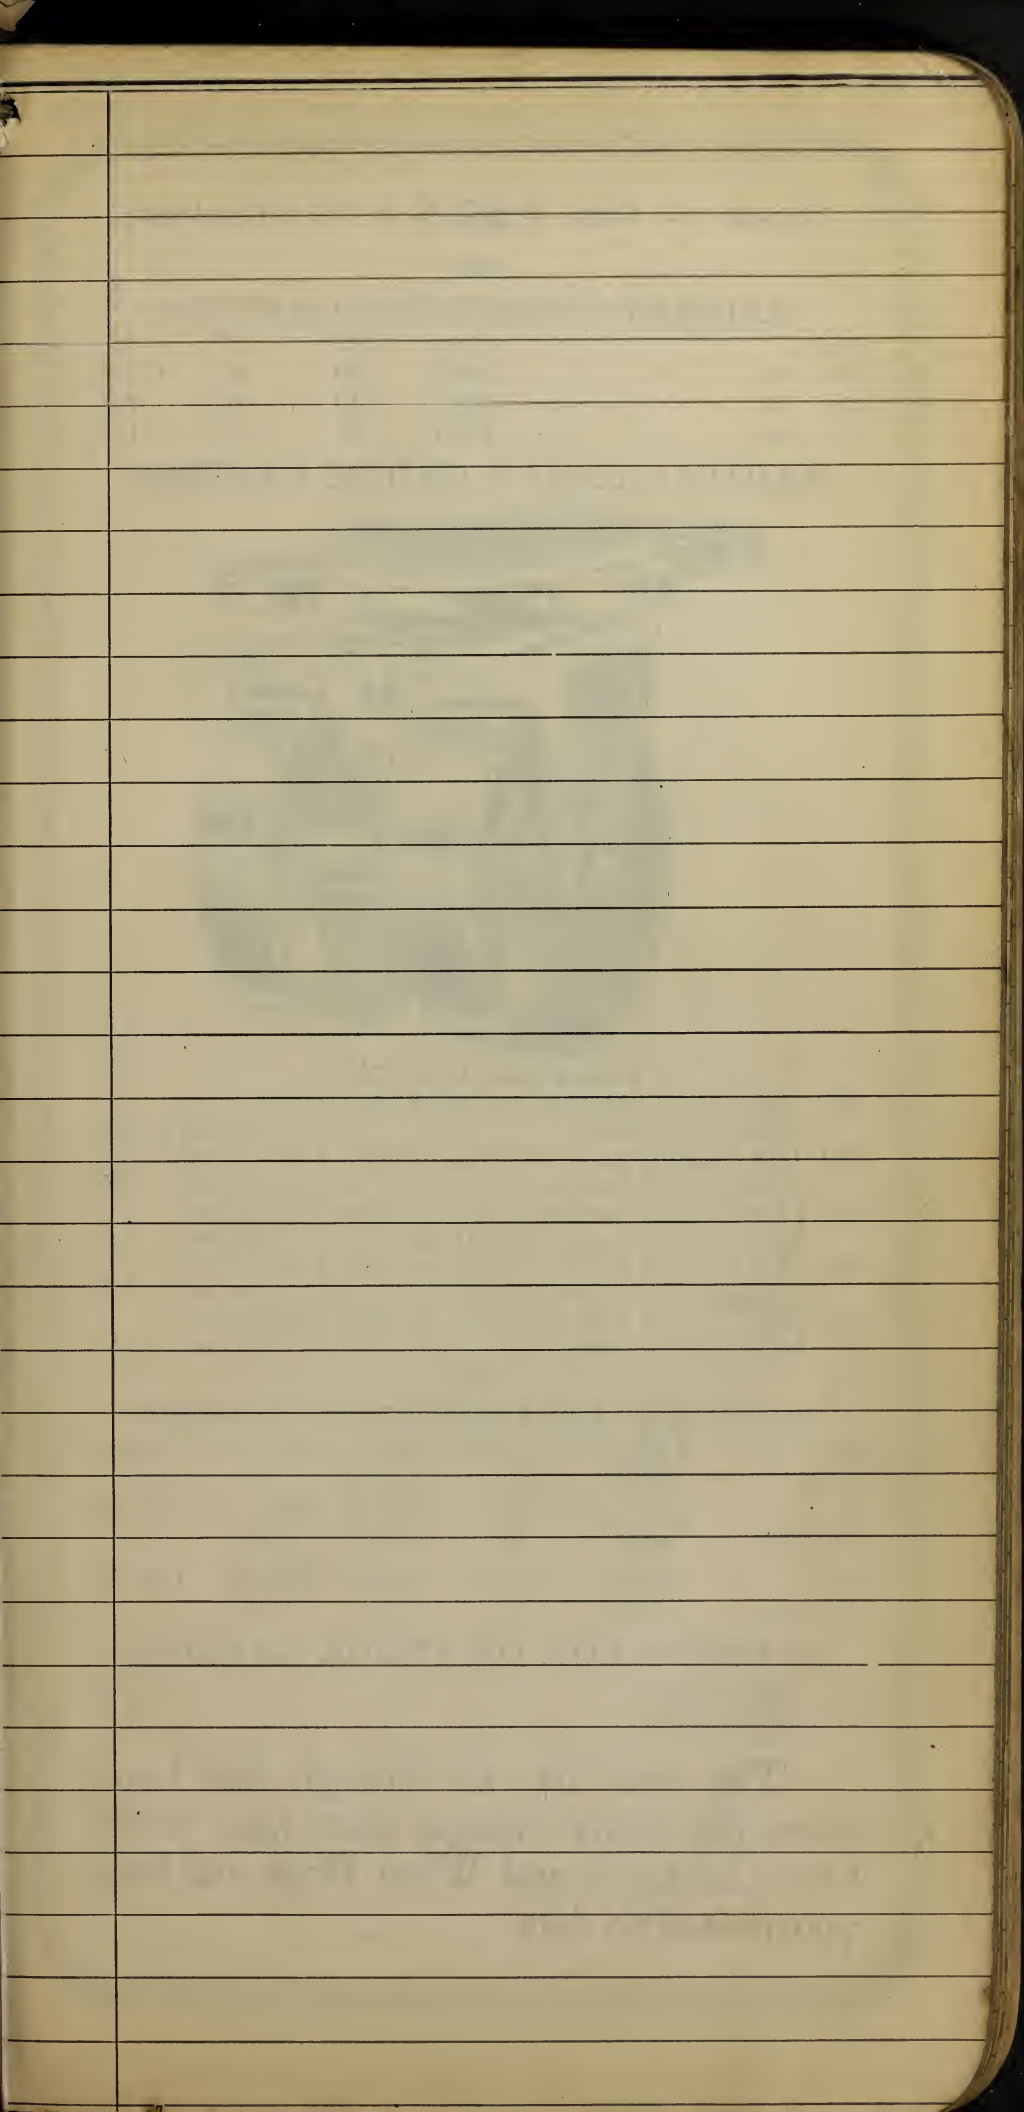

Wrought Steel Covered Frame and Wheel, Double Roller Bearings, Hardened Cups and Axle.

No. 9—King, corrugated two piece frame, japanned,
per dozen pairs - - - - - \$18.00

No. 7—Prouty, corrugated one piece frame, japanned,
per dozen pairs - - - - - 18.00

The corrugated feature of these hangers insures great strength and rigidity. The hangers are made throughout of steel, including the wheel. The drop prevents the door jumping the track or binding under any circumstances.

We shall be glad to send you, on application, catalogues on many special lines. Please note the list at back of this book and write us for prices on the goods you desire. Do you sell Sewing Machines?

BALL BEARING CASTERS.

Nos. 18, 19 and 20.

Nos. 15, 16 and 17.

Showing Construction.

Steel, All Parts Copper Plated and Rustless.

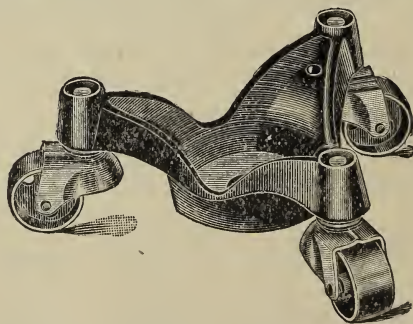

No. 18-1 in., countersunk,	-	-	-	per set	\$0.75
No. 19-1 1/8 in., countersunk,	-	-	-	"	.75
No. 20-1 1/4 in., countersunk,	-	-	-	"	.75
No. 15-1 in., lock stem,	-	-	-	"	.75
No. 16-1 1/8 in., lock stem,	-	-	-	"	.75
No. 17-1 1/4 in., lock stem,	-	-	-	"	.75

Made in one piece from sheet steel. The weight imposed falls directly over the center of gravity. There being no lateral strain, consequently there is no possibility of breaking or getting out of order. The surface ball revolves upon a number of small balls that are automatically interchangeable upon a steel disk, and moves in any direction with the slightest pressure. A child can readily move the heaviest furniture having these casters. The larger sizes are recommended where space will permit, as they act with greater freedom.

TRUCK CASTERS.

No.	-	-	-	4	7	8	10	14
New list	-	-	-	\$3.60	4.20	4.80	6.60	18.00

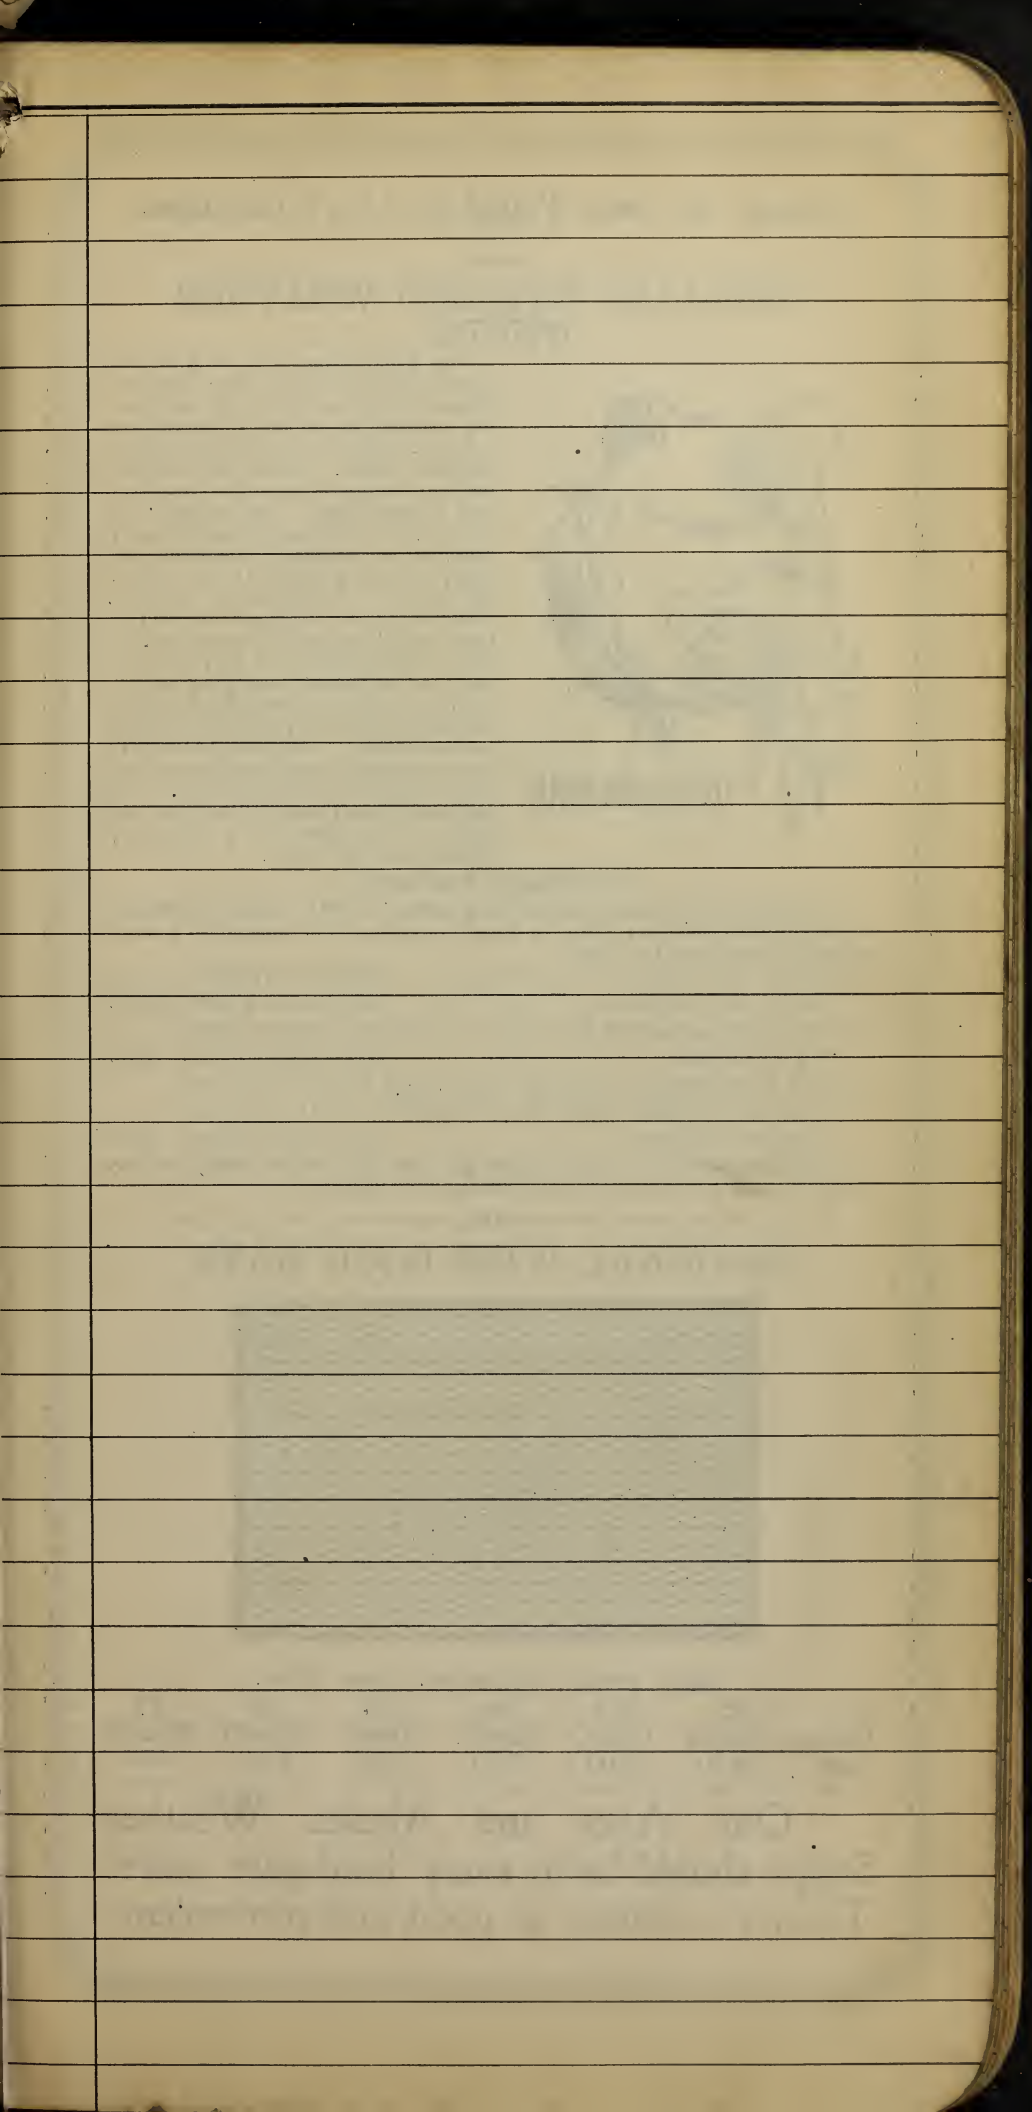

HARPER STOVE CASTERS.

No. 100-Improved, japanned, with 3 iron swivel wheels,
per dozen sets - - - - - \$15.00

The wheels are larger than heretofore used. The caster pins do not project above the arms. There is a screw hole through each arm so they can be fastened to any flat surface.

We carry a complete assortment of
Bed, Plate, Philadelphia, Tucker's, Mar-
tin's, Payson's, and Truck Casters; see
pages 400 to 405 inclusive.

406

METALLIC STITCHED WEATHER STRIPS.

"It's in the teeth"

The great superiority of Ajax and Alaska over the old style Metallic Weather Strips is shown in the manner in which the rubber and metal are secured. There's a certainty of their absolute union. They can be bent without danger of coming apart. Ajax and Alaska Strips are compact in size, attractive in appearance, easily attached or detached, absolutely secure, and being made of a fine quality of rubber are extremely durable. They are put up in lengths of 100 feet (one piece) in a small box, coiled so that any quantity can be pulled out and cut off without exposing the remainder. The stock is always clean and can be kept on the shelf as easily as door locks. A customer can carry all he wants in a small package and be sure of getting it home safely. See page 406 of our General Catalogue and write for samples. We also carry Wood Weather Strips.

New Handy Packages.

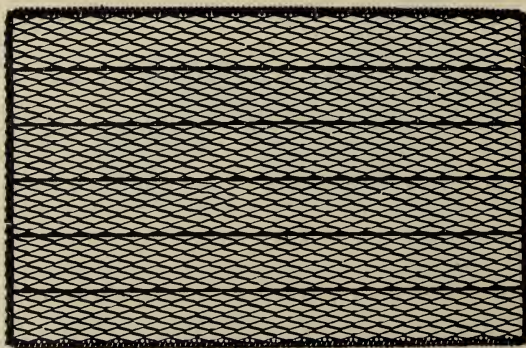

In addition to our usual method of packing in 100 ft. coils, we are now offering Alaska Weather Strips in boxes containing just enough for a small or large window and for doors.

- No. 40—Containing 10 ft. of $\frac{1}{2}$ in. Alaska Weather Strip for windows, - - - per dozen boxes \$3.00
 No. 50—Containing 15 ft. of $\frac{1}{2}$ in. Alaska Weather Strip for windows, - - - per dozen boxes 4.00
 No. 65—Containing 17 ft. of $\frac{5}{8}$ in. and 3 ft. of $\frac{3}{4}$ in. Alaska Weather Strip for doors (the short strip for bottom of door), - - - per dozen boxes 5.70

These numbers are very attractively put up in boxes 8x8x $\frac{3}{4}$ inches in size, complete with tacks and directions for applying.

FLEXIBLE RUBBER HEELS.

They can only be appreciated by being worn. They outwear the best leather; giving ease and elasticity to the step, preventing all jar when walking. Those who are called upon to stand or walk many hours a day will realize the luxurious ease they bring to tired feet. The testimony of thousands who are now using them is a guarantee of their universal adoption. When once worn, and their comfort fully experienced they will never be discarded. Packed one pair in a box, with nails and directions for applying.

BREAST CHAINS.

No. 3-Bright, without slide, with Covert tinned snaps,
extreme length, 30 in., - - - per dozen pairs \$9.25

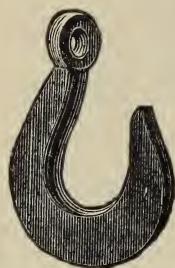

A hardware man need not be an expert pastry cook in order to sell a steel range; he need not be a painter by trade to sell paint; a pugilist to sell boxing gloves, nor a dressmaker to sell sewing machines. There are few women in this country who cannot operate a high grade sewing machine without instruction.

HAY RACK BRACKETS AND CLAMPS.

Showing Use.

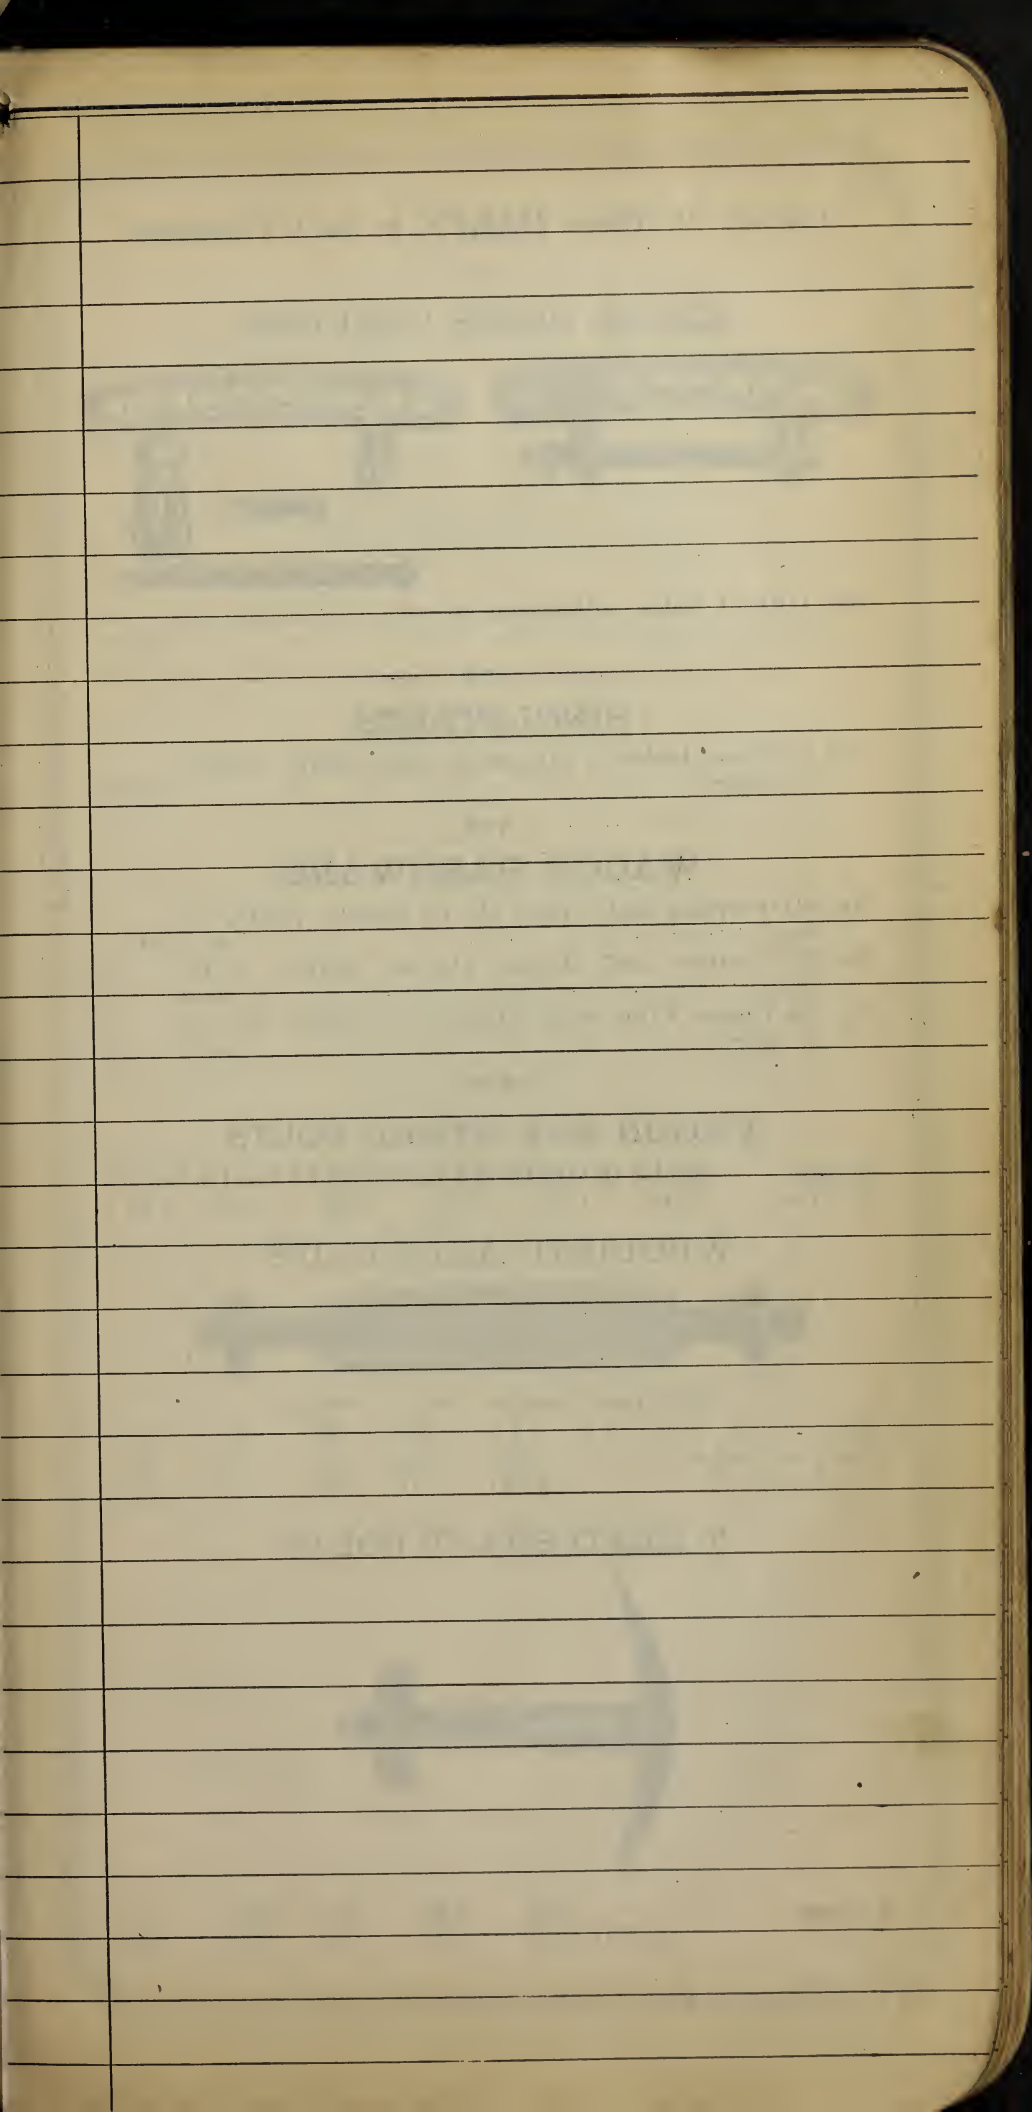

Showing Parts.

These brackets make the strongest kind of hay racks, as the wood is not weakened by boring holes for bolts where strength is most essential. By their use lighter material can be used. A hay rack made with these brackets is stronger and much more rigid than one made in the old way.

- No. 1—Consists of 8 14-inch wrought steel clamps, to clamp 2x4 in., 2x8 in., and 2x4 in., complete with brackets, upper washers, lower clips and nuts, per set \$2.00
- No. 2—Consists of 8 16-inch wrought steel clamps, to clamp 2x6 in., 2x8 in., and 2x4 in., complete with brackets, upper washers, lower clips and nuts, per set 2.10

No. 01.

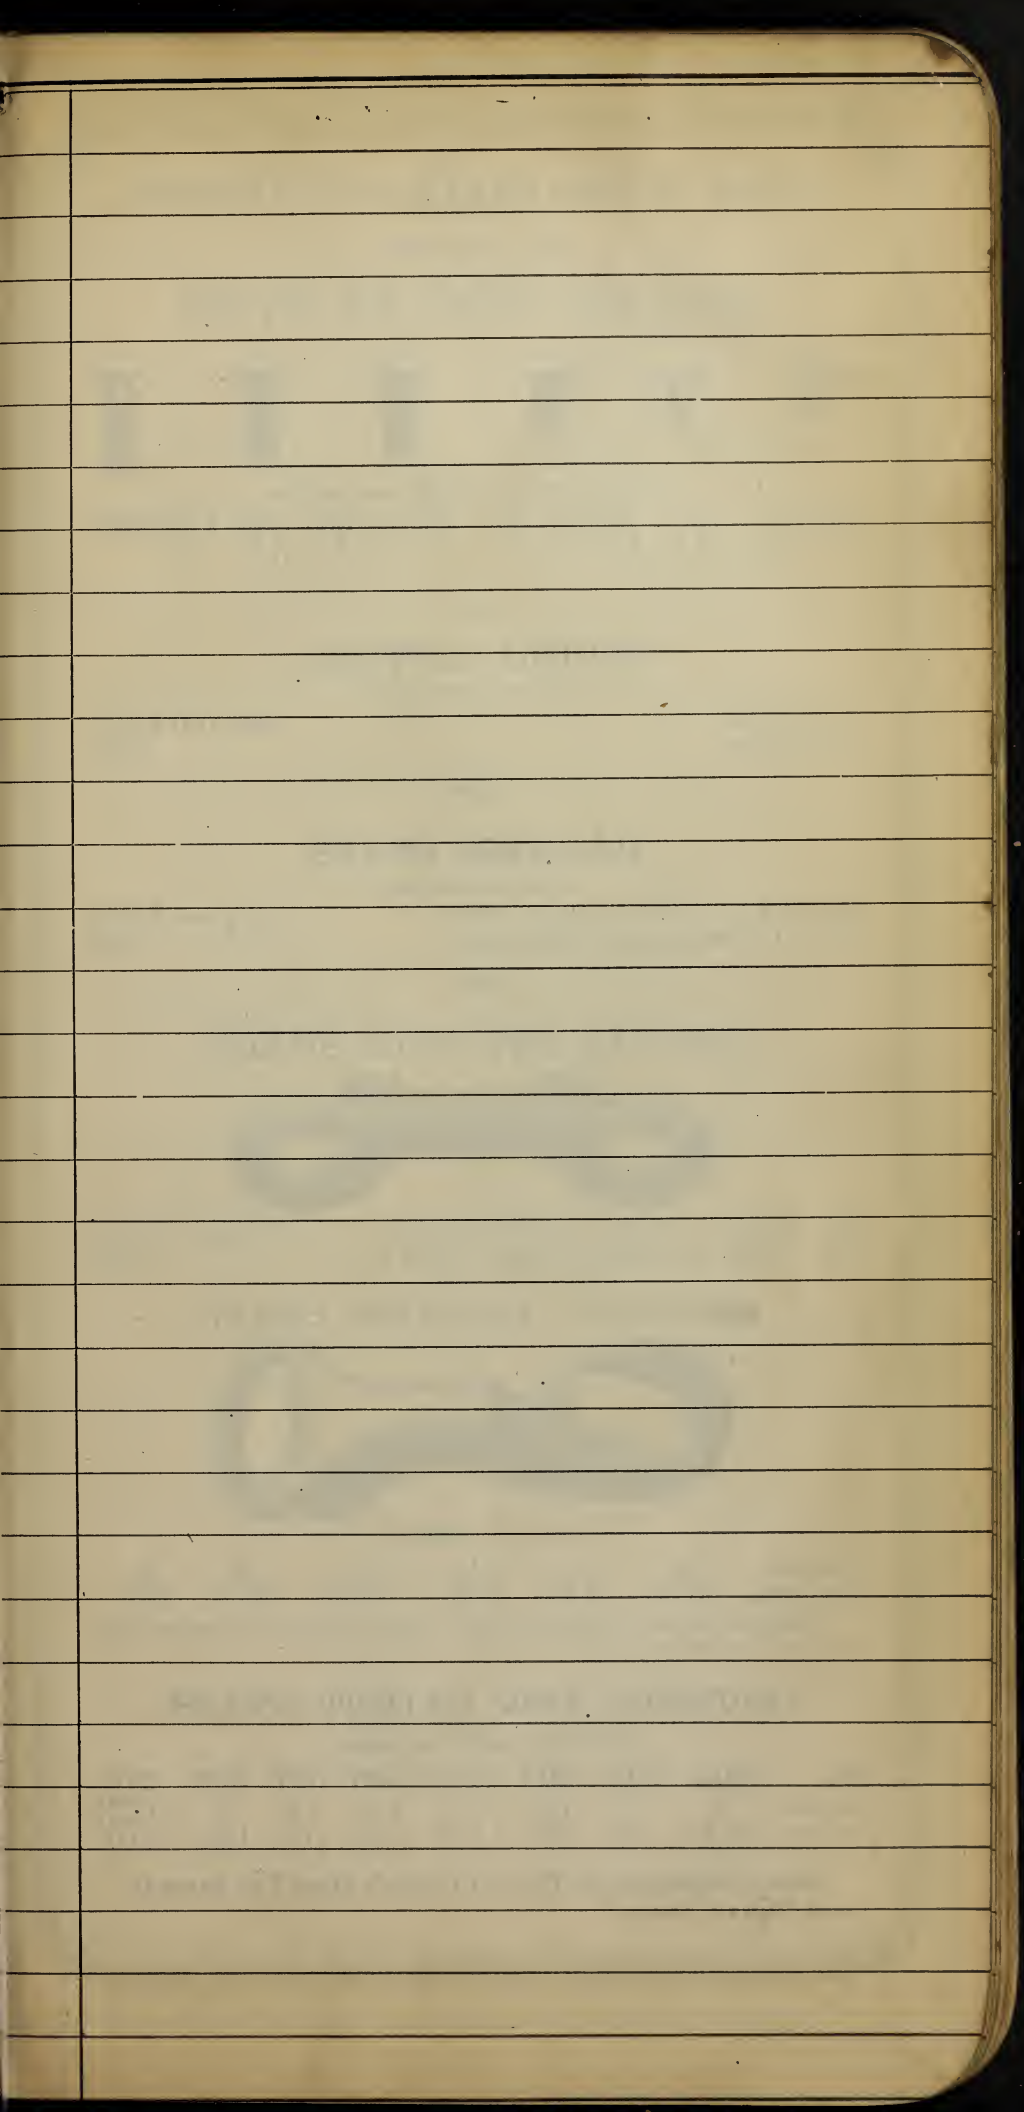

No. 1.

Malleable Iron, Polished Steel Working Parts.

No. 01—With anvil top and horn, 7x9 in., weight about 4 lbs., for No. 1 tubular rivets,	each \$ 2.00
No. 1—With anvil top, horn and vise, 8x10 in., weight about 6 lbs., for No. 1 tubular rivets,	each 4.00
No. 2—Extra strong, anvil top, pipe vise, inserted steel jaws, 10x12 in., weight about 12 lbs., 3 detachable dies for Nos. 1 and 3 tubular rivets, also for looping,	each 10.00

These machines will set all lengths of No. 1 tubular rivets, split or shoe rivets, without change or adjustment, and do absolutely perfect work. In riveting, the rivet is placed in the hollow upright in lower part of frame, head down, resting on a solid base. The tubular upright surrounding this is held in place by a spring, disappearing under pressure into the base as the lever is forced down. The rivet is thus protected, and is always forced straight through the work.

and tips.

Rapid.

Dalbey.

No. 37-7 in. Rapid,	-	-	-	-	per dozen	\$28.00
No. 38-8 in. Rapid,	-	-	-	-	"	30.00
No. 39-9 in. Rapid,	-	-	-	-	"	32.00

This auger is made for rapid, easy and constant work. The point, or auger, is of malleable iron to which the blades, made of tool steel, are riveted in such a manner that they will never become loose. The tubing is of wrought iron pipe of $1\frac{1}{4}$ in. external diameter, 28 inches long. The handle is 30 inches long, making it very easy to work hard ground.

This auger will dig in all kinds of ground, goes down perfectly straight, with no side motion and brings out all the dirt. It frees easily and will stand very rough usage. Weight about 14 lbs. each.

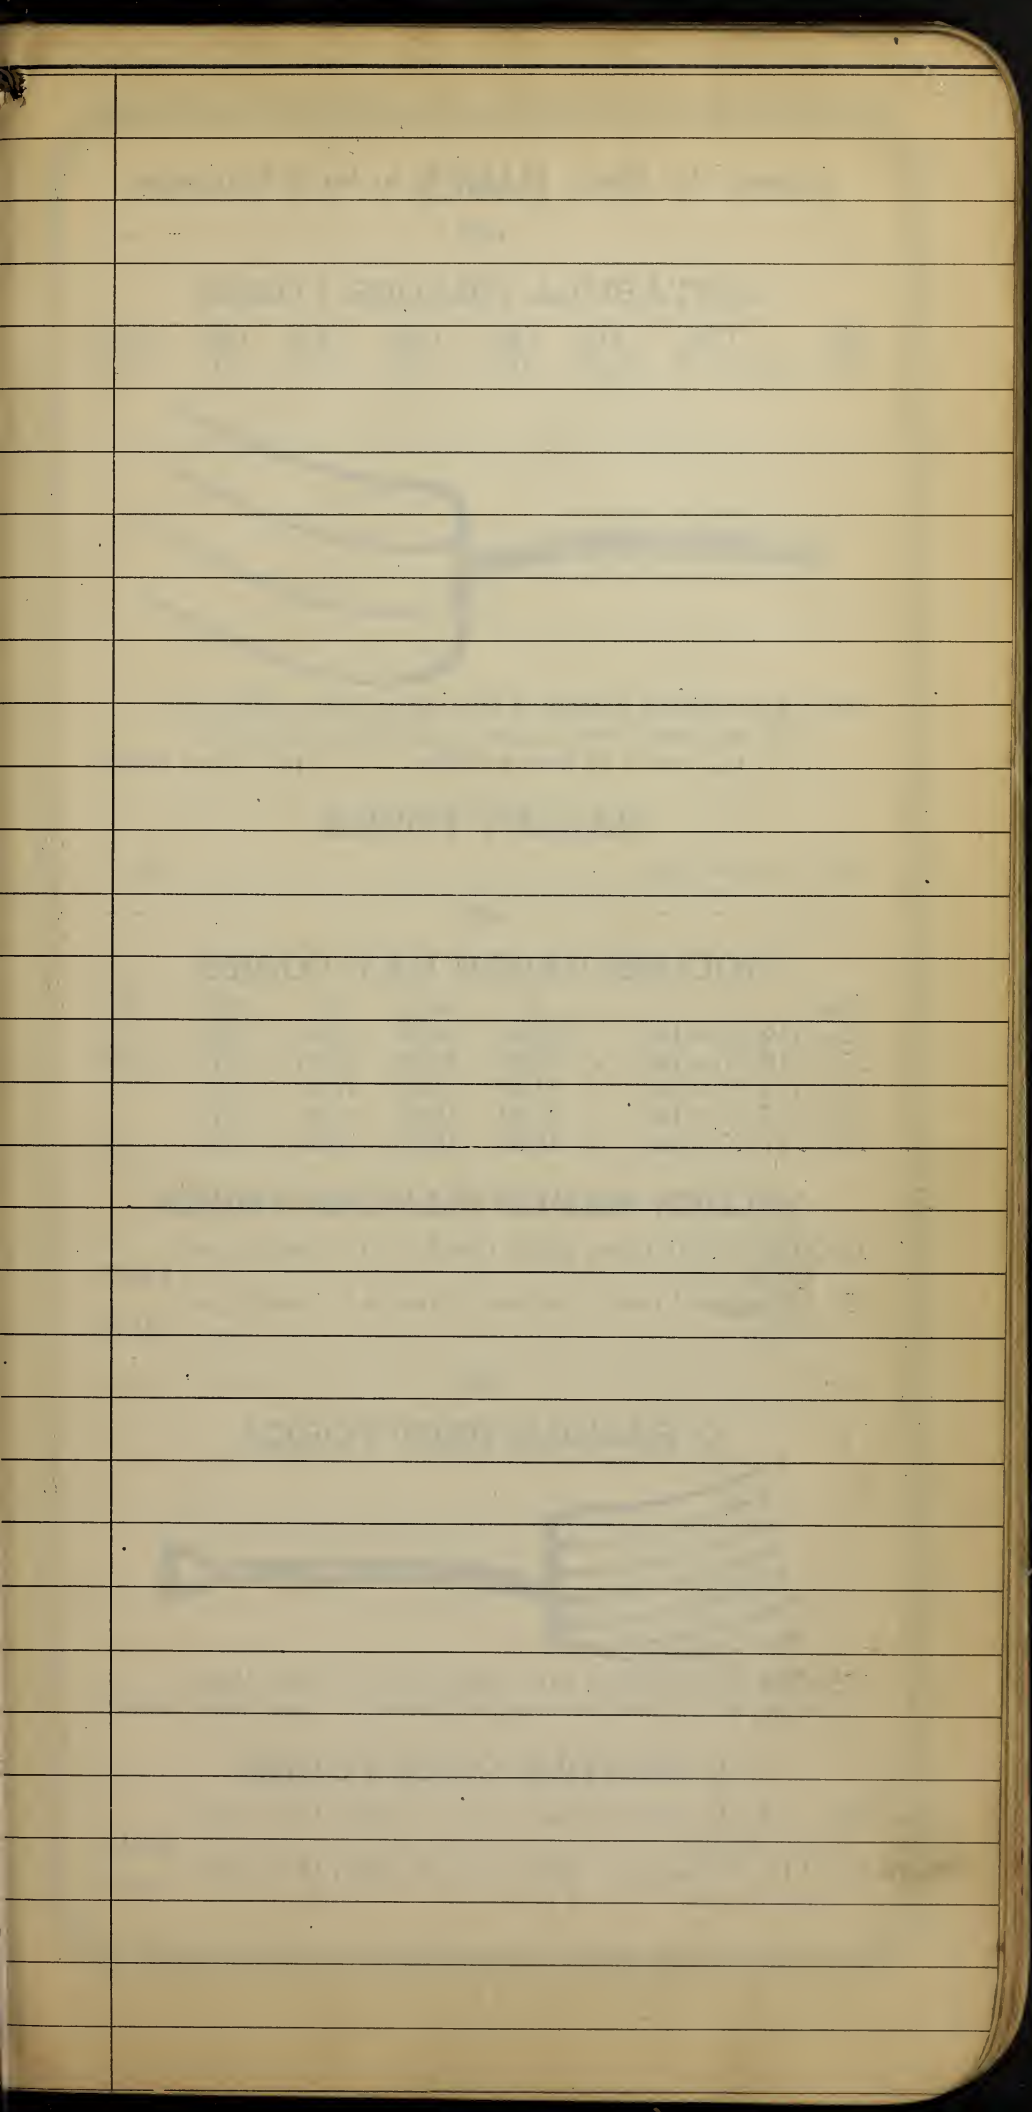

No. 48-8 in., Dalbey, cast base and blades, wrought tube, with handle,	-	-	-	-	per dozen	\$16.00
--	---	---	---	---	-----------	---------

The teeth in one blade do not track after those in the other, but cut in between. The long tooth in the right hand blade acts as the worm. The points break up the earth much more rapidly than knife blades and are especially good in hard ground.

563

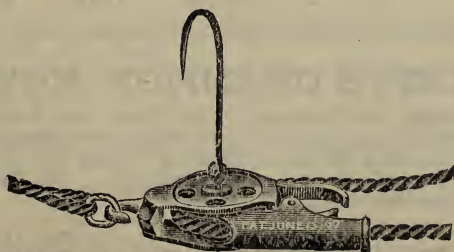

HAND GRAIN SEEDERS.

Operated by a transverse motion of the crank, which revolves the distributor and works the vibrator rapidly. Has a spring device which absolutely prevents the seed from clogging. Will sow from four to eight acres per hour, at common walking gait. The seed is not thrown upward, but distributed right and left uniformly, and will save at least one-third seed used in hand sowing. Will sow wheat fifty feet, buckwheat forty-eight feet, grass twenty-seven to thirty-six feet.

No. 10—Japanned iron frame and wheel, all parts detachable, adjustable to any position of the body and for any flow of seed, anti-clogging device, strong canvas bag, capacity 1 bushel, weight $3\frac{1}{2}$ lbs., - - - per dozen \$20.00

LAWN MOWERS.

The Bartlett, Ball Bearing.

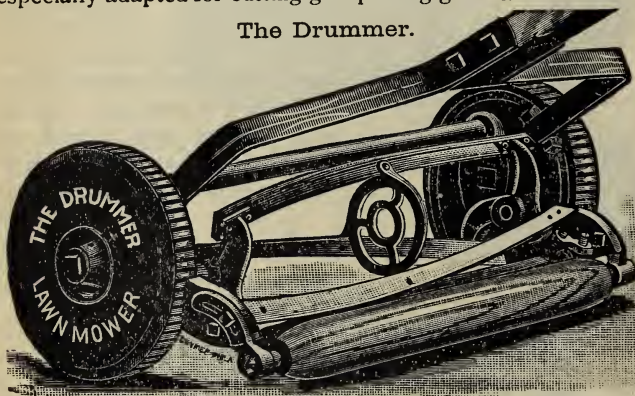

10 in. Driving Wheels, Five Solid Cast Steel Cutting Knives,
Two Center Braces, Bicycle Ball Bearing, Easily Adjusted.

Cut, inches, -	-	15	17	19	21
Each	-	\$23.00	25.00	27.00	29.00

The dust proof ball bearings are exactly the same as are used on high grade bicycles and the adjustment is as easily made. The mower makes hardly any noise, very easy to operate, and will give lasting satisfaction. The wheels are large and light, the reel is very rigid, each cutting knife being held firmly in position at four points. With the rapidly revolving reel and five cutting knives, very even work is secured. The adjustment of the roller permits of a very close to a high cut, as desired. The mower is beautifully decorated in gold and bright tints and striped. This mower is especially adapted for cutting golf putting greens.

The Drummer.

Three Knives, Rear Cut, 8 inch Wheels.

Cut, inches, -	-	12	14	16	18
Each	-	\$10.00	11.00	12.00	13.00

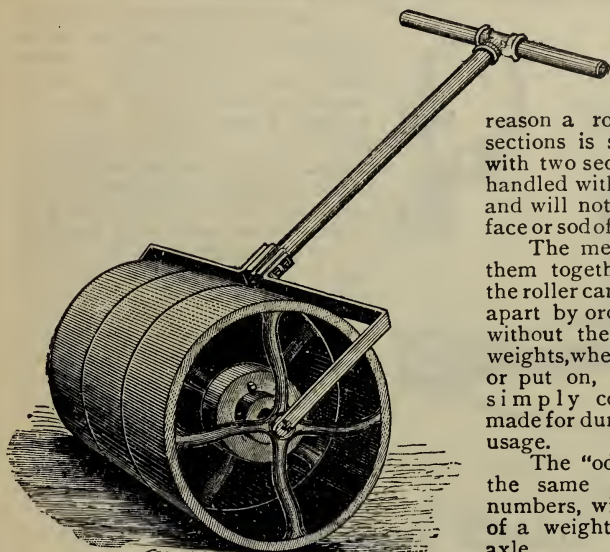

This is a low priced mower which will do good work and give good satisfaction.

ROWLETT'S CHAMPION MOWERS.

We recommend the Champion High Wheel and Low Wheel Mower as by far the best value to be had in medium price machines. We have sold over one hundred thousand of them during the last fifteen years and they have given almost universal satisfaction. The 1901 models are considerably improved in quality.

We carry a complete line of Philadelphia, Pennsylvania, Girard, also Horse Mowers.

LAWN ROLLERS.

As two sections in a roller are superior to one, for the same

reason a roller with three sections is superior to one with two sections. They are handled with the least labor and will not injure the surface or sod of the finest lawns.

The method of putting them together is such that the roller can be easily taken apart by ordinary workmen without the use of tools—weights, when used, taken off or put on, etc. They are simply constructed, and made for durability and hard usage.

The “odd” numbers are the same as the “even” numbers, with the addition of a weight secured to the axle.

Three Cast Iron Sections, Steel Braces, Tubular Handle.

GARDEN HOSE ON REELS.

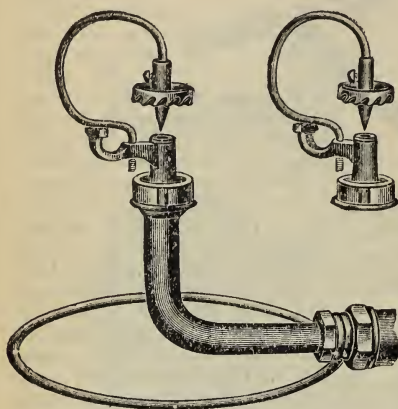

Yucatan, 3 ply, black, $\frac{1}{2}$ and $\frac{3}{4}$ in., guaranteed for 100 lbs. pressure, sold only in reels of 500 feet, per foot - - - - - \$0.90

This is a high grade hose in every respect. It is firm, elastic and will stand any hydrant pressure.

A reel of $\frac{3}{4}$ inch hose is 25 inches high, 28 inches in diameter and weighs about 225 pounds.

Our assortment of Guns, Rifles, Revolvers, Ammunition and Hunters' Sundries is very large. We include the full line in a separate catalogue. Please write for it.

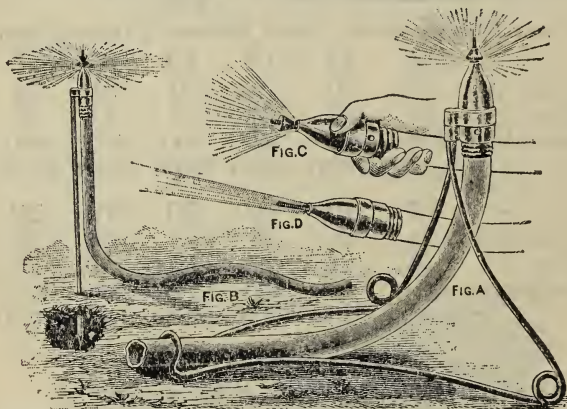

TURBINE LAWN SPRINKLERS.

Can be used in water that is full of sand. It never gets out of order. It distributes the water very evenly, and gives, when desired, a half circle distinctly defined; besides which, it is capable of quite a variety of adjustments. The ell on which the top of the sprinkler is screwed may be inclined in either direction at any angle, and, of course, may be set in an upright position. The turbine may be adjusted over the jet or at either side of it, thus giving a full circle or a half circle on either side. In addition to this, the top of the sprinkler may be unscrewed and attached directly to the end of the hose, and used in this way in connection with a hose holder.

$\frac{3}{4}$ in., aluminum bronzed, nickel plated head, adjustable to any angle, - - - - - per dozen \$20.00

LAWN SPRAYERS.

Young's Improved, brass, nickel plated, adjustable from finest spray to solid stream, with wire rod and sliding stand, - - - - - per dozen \$13.00
 Extra Discs, - - - - - each .25
 Extra Cones, - - - - - " .30

It is adjustable to any pressure of water, and the tenderest plants cannot be injured or broken down by the force of water. It can be raised or lowered to cover any area from 2 feet to 5 feet, according to pressure.

This sprayer found immediate favor with the park commissioners in Chicago. It is adapted to all work and pressures, and on account of the fine spray is especially useful for gardeners.

REVOLVING LAWN SPRINKLERS.

4 arm, - - - - - correct list to \$60.00
 8 arm, - - - - - " " 72.00

We also carry New Century Lawn Sprinklers and Rogers' Automatic Hose Nozzles, neither of which is illustrated in our catalogue.

READY ROCK ASPHALT ROOFING.

A good roofing which can be laid by anyone, and equally desirable for flat or half pitched roofs. It combines all the essentials of a perfect roof, being remarkably durable, light, handsome and fire-proof. Being a poor conductor of heat it is cool in summer and warm in winter. Many railroads are using it, besides large factories and Illinois State buildings.

1. 15 lb. Asphalt Felt. 2. Trinidad Asphalt. 3. Burlap. 4. Trinidad Asphalt. 5. Screened Gravel.

Does not contract and expand with varying temperatures, or dry out and crack. No coal tar used in construction and does not run or evaporate. Will not make the water taste. Seams are invisible and water proof. The gravel is screened very fine and pressed into the asphalt by rollers. Will not become detached by the wind and weather.

It is easily and quickly laid and requires no expert knowledge. It is shipped in rolls, securely packed, of 100 square feet (40 feet long by 32 inches wide) and weighs 130 pounds per square. Two inch space is prepared for the lap (making the net width 30 inches). A gallon of asphalt and one pound of nails are included with each roll of roofing. A knife and brush (for applying the cement) are furnished free of charge with each shipment.

Ready Rock Asphalt Roofing (shipped from factory), - - - - - per square \$5.00

BABY CARRIAGES.

We will issue a catalogue early in the year, embracing an entirely new line. Please write for it and ask for prices. Should we receive orders for styles shown in our No. 6 catalogue, we will send the nearest in price and style which we have.

656 to 663

CHRYSLITE ENAMELED WARE.

We have discontinued the Turquoise Enamelled Ware and are carrying a line known as "Chrysolite," the handsomest, most serviceable and best finished ware yet produced. It is made of heavy iron with three coats of enamel, and is absolutely pure and free from all harmful ingredients. For resisting acids it has no equal. Outside is green and white with beautiful marbled effect; inside is pure white, and edges black. It is finely marked, well covered and beautiful in its color effect.

We carry the same styles and numbers as we previously carried in Turquoise (pages 656 to 663) with numerous additions, all included in a special catalogue of the entire line. Please write for it.

In order to allow customers to test the selling qualities of this ware, we have prepared an "Assortment A" of 51 pieces, embracing 25 different sizes and kinds of our very best selling goods. Please order a case and note the quick sales.

UNIVERSAL TINWARE MENDER.

Will Mend Tin, Copper and Enameled Ware.

No. 10—Consisting of 3 strips of self-fluxing solder, sand paper and directions in paper package, - per dozen \$1.50

A self-fluxing solder, containing a flux so that no acid or resin is necessary to make the solder flow. The flux is non-corrosive and does not contain any poisonous matter. The solder is made in wire form, easy to handle and apply. Most every form of household utensil in tin, copper, or granite ware can be easily soldered or mended without the use of any soldering iron. All that is necessary is to heat the article over a kerosene lamp, gas jet or tallow candle, and touch the solder to the part to be soldered, when it will flow and close the hole or crack.

To mend enameled ware, scrape off the enamel around the part to be mended, before applying the solder.

735

FOLDING LUNCH BOXES.

Open.

Closed.

No. 5- $7\frac{3}{4}$ x $4\frac{1}{2}$ x $4\frac{1}{2}$ in., strawboard, covered with black cloth, patent fastenings, leather handle, - per dozen \$5.00

The box is made of strong air dried board. The outside is covered with strong, durable black cloth. This is an important feature of any box, and must necessarily add to its durability. Every working part is well reinforced with the same cloth as outside covering. There are no weak parts to give out by constant folding. The inside of the box is lined with a leather colored jute lining.

read either Cast, Enameled, Extra Finished
or Steel, as we carry these four grades.

Stove Pots and Stove Kettles of all
kinds are made both Flat and Round
Bottom; to avoid error your order should
state plainly which is wanted.

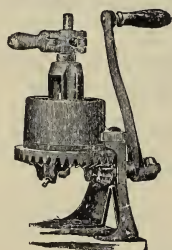

ENTERPRISE DRY BONE, SHELL AND CORN MILLS.

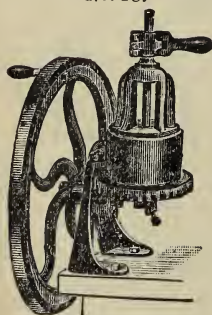

No. 750—Height 17¼ in., length 12 in., width 8½ in., diameter of throat 3½ in., diameter of wheel 19 in., weight 60 lbs., capacity 1½ bushels of corn per hour, each \$7.50

A good general mill for farmers and poultry men. Especially adapted for grinding bones (when dry only), shells, corn, roots, bark, grain, chicken feed, salt, etc. This mill is not intended for grinding green bones, as green bones have to be shaved and require a special machine.

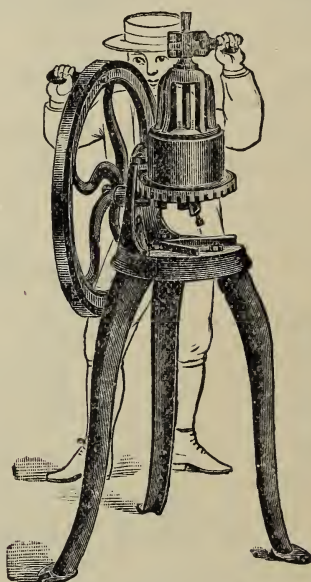

MANN'S NEW GREEN BONE CUTTERS.

No. 1C.

No. 1B.

Nos. 1BM and 4BM.

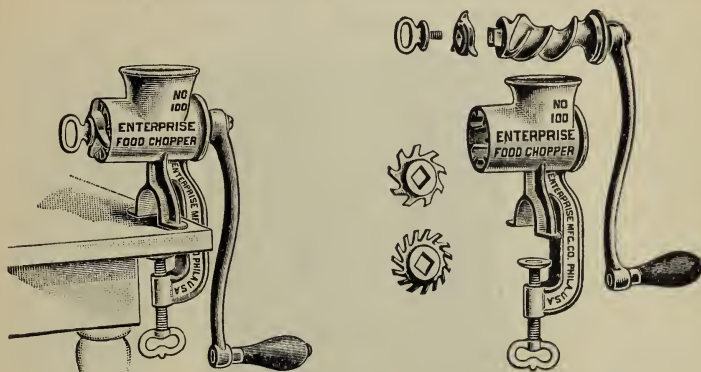

- | | | | |
|---------|---|---------------------------|--------------|
| No. 1C | -5 in. cylinder, with crank, to bolt to bench, | weight 30 lbs., - - - - - | each \$ 7.50 |
| No. 1B | -5 in. cylinder, with crank, to bolt to bench, | weight 55 lbs., - - - - - | each 10.00 |
| No. 1BM | -5 in. cylinder, with balance wheel and standard, weight 80 lbs., - - - - - | each 15.00 | |
| No. 4BM | -6½ in. cylinder, with balance wheel and standard, weight 105 lbs., - - - - - | each 25.50 | |
| No. 2 | -8½ in. cylinder, with balance wheel and standard, weight 140 lbs., - - - - - | each 27.60 | |

The following are some of the manufacturer's claims of superiority. They cut faster, finer and easier than any other. They are the strongest and most durable. They are the lowest in price. They will duplicate in every part. They will cut dry bones or green bones. They have less friction. They will cut the hardest bone in the animal. They can be run by a boy or woman easily. They have the only correct Automatic Feed. They leave both hands free to work with. They have finely tempered steel knives. The knives are adjustable to cut coarse or fine. The knives are easy to sharpen; any one can do it. Free knife holder and gauge with every machine. Will last a lifetime with ordinary care.

ENTERPRISE FOOD CHOPPERS.

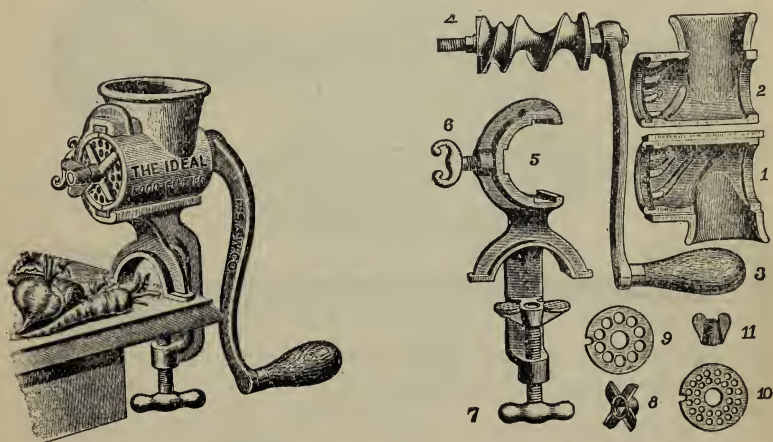

Chop Any Article of Food, Fine or Coarse.

No. 100-Tinned iron, with clamp, phosphor bronze bearing, 3 cutters, weight $4\frac{3}{4}$ lbs., - per dozen \$18.00

This chopper is intended for general use and will chop almost anything. It is exceptionally well made; is easily cleaned; does quick and perfect work, and can be taken apart and cleaned almost instantly. The phosphor bronze bearing prolongs the life of the machine very materially; also adds to the ease in operating.

IDEAL FOOD CHOPPERS.

No. 25-Tinned, with clamp and 2 knives, cuts 2 lbs. per minute, weight 4 lbs., - - - per dozen \$24.00

Will cut all kinds of meat, celery, onions, spinach, potatoes, horseradish and other vegetables; figs, dates, apples and other fruits. It is very simple in construction, easily taken apart for cleaning, and has very few parts. All parts are interchangeable and can be replaced if lost or broken.

"IDEAL" ICE CREAM FREEZERS.

This freezer consists of an indurated fibre tub, mounted on a wooden base by a hinge support, which passes through the center of the inside can, and upon which the pail revolves. The can is secured to the top of the pail by a tinned steel top or rim, forming a space for water on the sides and bottom of the cream can. The ice chamber is filled through an opening in the rim, and is made watertight, avoiding the danger of spoiling the cream. The freezer is provided with a scraper and dasher. It can be dismounted for the purpose of cleaning. The manufacturers claim that the Ideal will freeze cream with less ice and in less time than any other freezer on the market.

Ideal-4 qt., wood base, tilting fibre tub, tinned steel can, - - - - - each \$3.50

HANDY FORCE PUMPS.

Showing Valve and Air Passage.

No. 25-Seamless rubber cup, 3 ft. handle, per dozen \$24.00

It is a standard tool for the plumber, hotel and flat owner, and should be in every house where running water is used. It will clean the trap of any sink, wash bowl, urinal or closet in a minute, and used occasionally keeps traps clean and prevents sewer gas and sickness.

PITCHER SPOUT PUMPS.

No. 4-4 in. cylinder, - - - - - new list \$6.25

RUBBER PUMP BUCKETS.

Victor in Use.

Showing Rubber Turned Back.

Star.

Victor, best quality white rubber, malleable galvanized iron links, adjustable thumb nut, - per gross \$20.00
 Star, flat top, rubber supporting braces, - per gross \$11.00

The advantage claimed for the Star is that, owing to the construction, the column is lifted instead of forced against the outer edge, and consequently will not leak but deliver much more water than the old style buckets.

820

ANTI-BENT WOOD CHURNS.

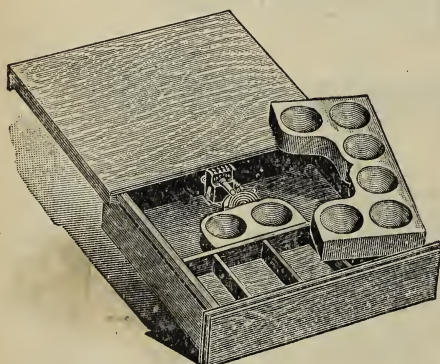

Made of the very best selected white ash lumber. Rabbed into the ends and put together with hydraulic pressure, making leakage an impossibility, and is constructed so that all parts swell and shrink together, which prevents splitting. Every churn warranted.

Each size is a full gallon larger than similar churns of other manufacture.

No.	-	-	-	1	2	3
Gallons,	-	-	-	5	7	10
Each	-	-	-	\$8.00	8.50	9.00

No. 0 Star Churns should read 6 instead of 8 gallons.

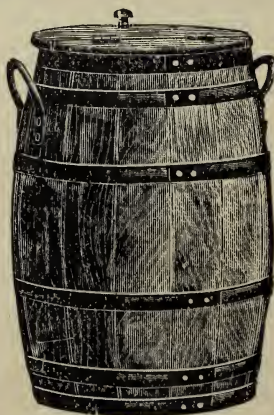

MONEY DRAWERS.

The gong is the same as used on clocks and has a deep tone which can be heard at a distance. The front board is square, with moulded edge, and covers the side supporting slides from view. The inside edges are rounded and finished smooth.

HANDY VEGETABLE SLICERS.

No. 2- $2\frac{3}{4}$ in. wide, corrugated steel blade, - per dozen \$2.50
No. 4-4 in. wide, corrugated steel blade, - " 3.20

For slicing apples, pears, bananas, potatoes, beets, cucumbers, turnips, radishes, carrots, cabbage, etc. Make dainty and attractive perforated flutings and Saratoga chips in various designs.

STERLING FRUIT AND VEGETABLE SLICERS.

Slices all kinds of vegetables and fruits—any thickness—all slices even. Makes the best cold slaw, Saratoga chips, recuts for French fried potatoes, squares for soups, etc.; prepares vegetables in squares or strips for cooking; slices sausages and cooked meats, cuts up anything for salads, meat for meat pies, material for pickles, and has a great variety of uses. The adjustment of thickness of the slices is made by pushing the disc on the outer end of the shaft, in toward the body of the machine for thin slicing, or toward the end of the shaft for thicker slicing. It is well made, has tempered steel blade, well protected, and is easily taken apart for cleaning or brushing.

Will Slice all kinds of Fruits and Vegetables.

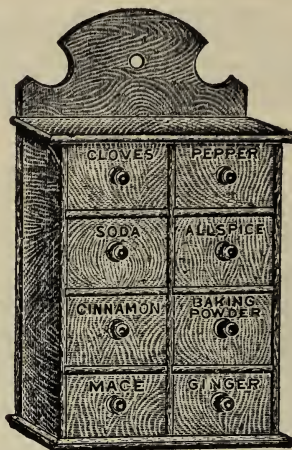

No. 5-Walnut bronzed frame with screw clamp, heavy tempered steel double blades, 11 in. cutting surface, nickel plated adjustable disc, safety feed, per dozen \$24.00

We carry a complete line of Nickel Plated Brass Bathroom Supplies for which we issue a separate catalogue. These goods are being sold very largely, and no new house is complete without a few of the very useful and beautiful accessories made for this purpose.

MOP WRINGERS.

- No. 30—Cedar pail, electrically welded hoops, maple rollers, with steel axles, tempered steel springs, steel treadle, malleable iron guide plates and foot holder, with bail, - - - per dozen \$30.00

This is an exceedingly useful device, and greatly reduces the drudgery of mopping, as with its use the hands are not wet, consequently strong lye water may be used. It is made to overcome faults of other makes; will not entangle mop cords. The pressure of the foot on the treadle wrings the mop quickly and satisfactorily.

Pipe Water Fronts, \$3.00 List. Cast Water Fronts, \$4.00 List.

Closet, difference between list of Range with and without Closet.
Shelf, \$2.00 List Less than Closet.

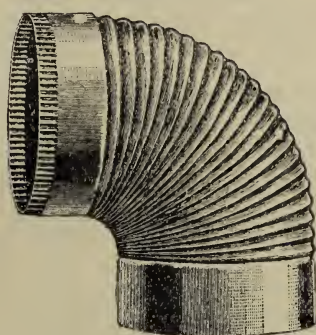

Manufactured of cold rolled steel. Ovens thoroughly bolted and braced. Asbestos lined throughout and detail similar to ranges without the reservoir. The reservoir is cast iron, white enameled. The reservoir casing in which the reservoir sets is made of steel. The outer casing is painted on the inside and lined with asbestos mill board $\frac{1}{8}$ inch in thickness. The inner casing is painted on both sides. These two, the inner and outer casings, and mill board form the framework or body in which the reservoir is placed. The bottom of this casing or framework is also made of two thicknesses of steel, painted in the same manner as the inner and outer casings. This painting and double casing make the complete reservoir absolutely rust-proof and more durable than cast iron, and will last as long as any portion of the range.

Left Hand only. Brick Lining for Hard or Soft Coal.
Iron Lining for Wood. Be particular to specify fully in ordering.

NEW CENTURY VAPOR LAMPS.

No. 5.

No. 15.

No. 25.

Complete, with Burner, Shade, Chimney and Mantle.

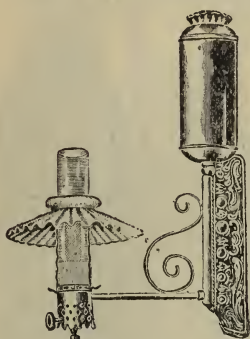

No. 5—1 light, bracket, maroon frame, polished brass stationary reservoir,	-	-	-	-	each	\$4.50
No. 15—1 light, hanging, maroon frame, polished brass stationary reservoir,	-	-	-	-	each	4.50
No. 25—2 light, hanging, maroon frame, polished brass stationary reservoir,	-	-	-	-	each	7.25

These lamps are made by a firm which has had long experience with gasoline burners. The lamps have been thoroughly tested and are giving excellent satisfaction wherever used. They have been approved by the underwriters representing the fire insurance companies. The burners are simple in construction and easily operated. In lighting, a small quantity of alcohol is poured into the cup at the base of burner; when this has burned out, the horizontal stop cock is opened by turning, and a match held to the top of chimney. The lower knob operates the cleaning needle, which is used to remove any sediment which may lodge in the aperture.

910

THE CONOVER TYPEWRITER.

List price, \$40.00

This superb typewriter is the result of long years of experience in the manufacture of these useful machines. Whatever has been found as strictly essential to the production of clean-cut, attractive work has been retained and improved to the highest possible degree. Whatever experience has proved to be unnecessary has been eliminated, making the Conover a marvel of simplicity.

Only 325 parts to understand and keep in repair, while most other typewriters have 2,000 or more.

Standard keyboard, easily acquired by all. Its thirty-two keys print ninety different characters, while most typewriters print only seventy-eight to eighty-two characters.

The type of wheel has the period, interrogation point, hyphen and comma the same in both upper and lower cases, thus obviating the necessity of a shift when using these characters and greatly increasing the speed in operating.

Characters on steel cylinder, which can be taken out, cleaned and replaced in a few seconds without danger of injuring the type or alignment, a most desirable feature.

The carriage is the lightest, easiest running in the world, and is superior for receiving both paper and envelopes. Can also be released as well when raised as when lowered, and can be stopped at a given point.

The marginal regulator can be instantly adjusted for any width of paper.

Immense advantage is gained by having the mechanism all encased, thus relieving the eyes from the annoyance of the constant motion of the machinery while writing, as with most other typewriters.

The Conover Typewriter will do as good work as any one hundred dollar machine.

It is a first-class typewriter and will do all classes of work.

It is simple, strong, rapid and not liable to get out of order.

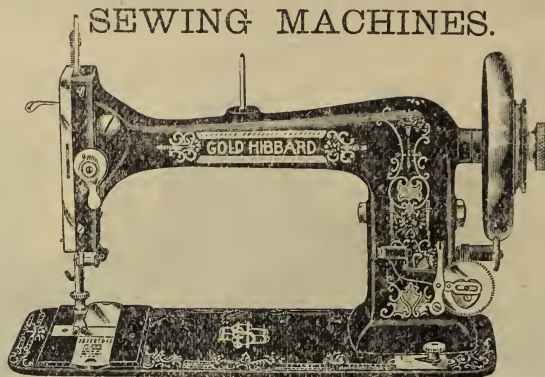

It will do all that any other typewriter will do and do it as well.

910

SEWING MACHINES.

The Ball Bearing Gold Hibbard.

We consider The Gold Hibbard the best sewing machine for all purposes and all classes of trade ever placed on the American market. It has numerous features not possessed by other machines, which tend to make it a non-sensitive, easy machine to operate.

It can be run backward without breaking the thread.

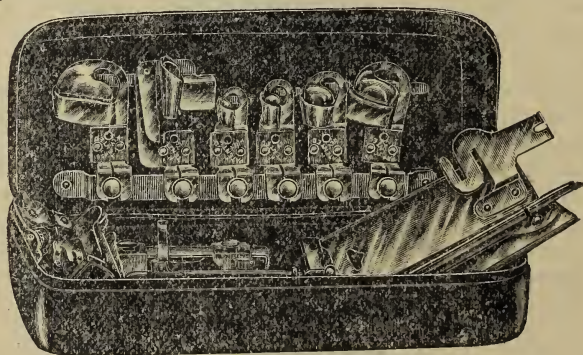

It is unnecessary to change the tension when lengthening the stitch, as it will not draw nor pucker the work.

It has a flat needle bar, which is hardened and ground. Lost motion is impossible, even after the longest wear.

The attachments are the finest in finish and easiest in operation of any used on a modern sewing machine.

The cups and cones in the ball bearings are all turned from tool steel and tempered, and fitted with ball retainers. We use a wooden pitman, making the bearing noiseless.

We have four styles of this machine, a five drawer cover style, five drawer drop head, seven drawer drop head, and parlor cabinet. All the woodwork is quarter-sawed, either golden oak or sycamore, piano finish. All drawer cases are nickel plated.

Attachments.

These consist of a Ruffler, Tucker, Binder, Braider Foot, five Hemmers of assorted widths, Shirring Slide, Under Braider Slide, Quilter and Foot Hemmer and Feller.

They are the finest, both in appearance and operation, that can be secured. The parts are riveted together (no solder) and the attachments are heavily nickel plated, then buffed to the highest polish.

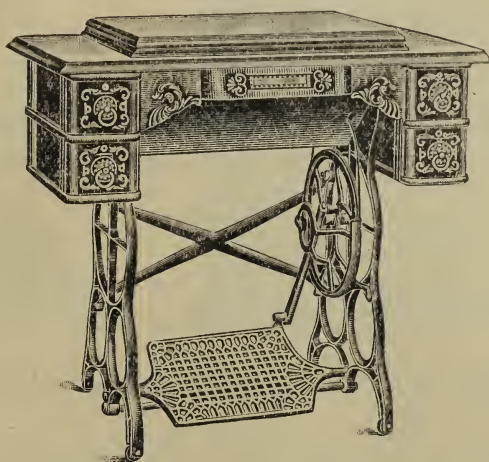

The ruffler blade can be removed and another one inserted perfectly without the aid of any tools. The attachments are all tested before being sent out.

The accessories are as follows: Oil Can (filled), 12 Needles, 6 Bobbins, large and small Screw Drivers, and 2 Wrenches.

Consult All These **PAGES** in No. 6 Catalogue

910—Continued.

SEWING MACHINES.

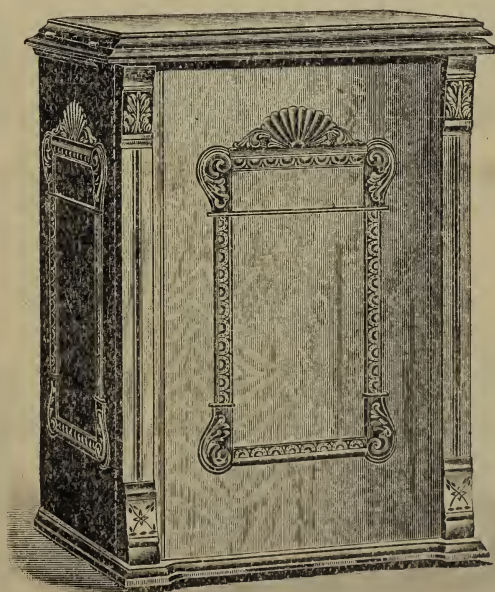

No. 56, Closed.

The Ball Bearing Gold Hibbard.

This style is the best seller in our whole line. No. 76 is the same machine with two additional drawers.

Please note description of head and attachments on previous page.

We also carry this machine with box top and five drawers, No. 55.

No. 67 (Parlor Cabinet), Closed.

This is the latest thing in sewing machine woodwork. A very highly finished, stylish article.

The head and attachments are the same as shown on previous page.

Card of Labels.

Interior of Drawers.

No. 210. 14 Drawers.

Oak Front Drawers, Cherry Stained Case, Brass Pulls and Label Holders.

No. 150-10 drawers, 150 compartments, height 23 in., width 30 in., depth $16\frac{1}{2}$ in., weight about 80 lbs., each \$15.00

No. 210-14 drawers, 210 compartments, height $31\frac{1}{2}$ in., width 30 in., depth $16\frac{1}{2}$ in., weight about 100 lbs., each 18.00

Each drawer is divided into fifteen compartments, size $2\frac{1}{2} \times 3\frac{3}{4} \times 3$ inches, with strong wood partitions.

With each case is furnished seven cardboard sheets of labels, marked so that they can be readily cut apart and exactly fit the holders supplied to each drawer.

HARDEN HAND GRENADES.

To extinguish a blaze throw the grenades as near the base of the fire as possible in quick succession. In using the tubular pattern grasp the lower end of grenade and with a quick blow break off the top just under the cork, throw the liquid at the base of the flame vigorously. Packed half or one dozen in a case. We do not break cases.

No. 7-Tubular, capacity 1 qt., size $2\frac{1}{2} \times 18$ in.,
per dozen - - - - - 12.00

FIRE EXTINGUISHERS.

This is one of the very best as well as the very simplest fire extinguishers on the market. It is very carefully made and well finished. The ingredients used are to be found everywhere, the simplicity in the manner of mixing, the perfect separation of ingredients while not in use, and its durability should strongly commend it to all for quick and effective protection against fire. The pressure caused by the formation of gas in the cylinder is sufficient to throw a stream a distance of fifty feet. There is nothing to get out of order, no cocks to open or close; simply leave alone until wanted, then invert and it will do the rest.

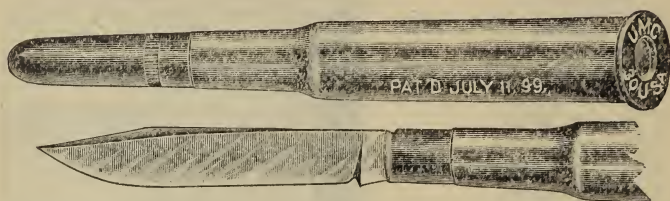

No. 7.

H. S. B. & Co.'s, copper cylinder, height 21 in., capacity about 3 gallons, brass screw top, each \$10.00

ALUMINUM ANTISEPTIC LATHER BRUSHES.

Compressed Aluminum Ferrule.

No. 1M—Small,	2¼ in., fine bristles,	-	per dozen	\$6.00
No. 2M—Medium,	2¾ in., fine bristles,	-	"	6.50
No. 3M—Large,	2½ in., fine bristles,	-	"	7.50

An indestructible brush, so constructed that it holds nearly twice the ordinary amount of lather. The bristles cannot become loose nor the ferrule break. Bristles are cured in an antiseptic solution, which prevents spread of disease.

With first order of one dozen or more of these brushes, a handsome glass front easel display stand will be furnished if requested, without extra charge.

HARMONOPHONES.

No. 1—Clover, 10 holes, single reed, brass lined, nickel plated case, detachable nickel plated phone, per dozen - - - - - \$9.00

This phone not only gives the music remarkable richness and purity, but increases it in volume to a great extent. It acts like the metal horn of a phonograph, taking up every note however faint, from the softest tremolo to the fullest and most sonorous tones, and sending them forth with wonderful effect. The phone is attached to the mouth organ by metal flanges and can be detached and attached instantly.

STERLING SILVER WARE.

During the fall of each year we issue a catalogue of Solid Silver Goods for holiday trade, embracing spoons of all kinds and sizes, and a large assortment of novelties which are peculiarly adapted for solid silver. Please write for catalogue and prices.

CUT GLASS WARE.

For several seasons we have issued a special catalogue of Cut Glass Ware. Our patterns have been great favorites and are surprisingly low for the large amount and quality of the cutting. Write for catalogue and prices.

The new goods in Guns, Rifles, Revolvers, Hunters' Sundries, Fishing Tackle, Sporting and Gymnasium Goods, Golf Clubs and Supplies, Paints, Oils, Varnishes, and Paint Brushes are included in separate catalogues in which we illustrate our full assortment of each line.

PETERS IDEAL LOADED SHELLS.

Color, Beautiful Cherry Red.

A very high base, reinforced shell, with high brass battery cup, Peters' No. 3 primer. Loaded with King's smokeless powder. These shells are unexcelled, insuring highest velocity, low pressure, fine pattern and a clean barrel.

KING'S SEMI-SMOKELESS POWDER.

Sizes, FFFG, FFG, FG and CG.

Kegs, 25 lbs. (bulk),	-	-	-	-	each \$10.00
Half Kegs, 12½ lbs. (bulk),	-	-	-	-	" 5.25
Quarter Kegs, 6¼ lbs. (bulk),	-	-	-	-	" 2.75
Pound Cans, (bulk),	-	-	-	-	" .50

Combines all the best qualities of black powder with the best qualities of nitro powder. Gives the highest velocity of nitro powder with the low bursting strain of black powder. Produces very little smoke and no offensive odor; leaves but the slightest deposit; does not cake or cause leading, pitting or discoloration of gun. Gives a fine pattern; is quick, strong, penetrating, far reaching, always accurate and reliable, and is as safe as any black powder.

Peters Cartridges are unexcelled for penetration, accuracy and cleanliness. Every one warranted.

A Friendly Suggestion.

The question of protection from fire by insurance is of vital importance to every one who owns property subject to loss in this manner. Nowadays nearly all merchants carry an insurance of at least fifty per cent. of the value of their insurable property.

The total or partial destruction of your stock and buildings by fire is always a possibility, even in the so-called fire proof structures. We do not know the total value of the property which went up in smoke in this country last year, but the insurance companies paid losses aggregating over \$92,000,000, and their total disbursements exceeded, by \$17,000,000, the premiums paid to them.

In 1900 the fire losses have been even heavier.

Among our own friends our attention is frequently drawn to unfortunate instances of the misguided economy of "Carrying your own insurance." In recent months so many customers have suffered severely from this policy that we have determined to offer a "friendly suggestion" to those who carry no insurance or inadequate insurance.

We urge:

That every one should consider it a duty to himself and to his family to safeguard his future with ample insurance. His duty to his creditors in this respect should be held no less important.

That the cost of insurance is an ordinary trade expense and should be paid as willingly as clerk hire or rent.

That if your risk is so hazardous as to command high rates, the danger to you is more imminent.

To the fully insured we suggest the continuance of their vigilance. To the PARTIALLY PROTECTED we recommend that "a good work be not left undone." To the UNINSURED we can but point out the trouble and loss which may come and advise AN IMMEDIATE CHANGE OF POLICY.

If you are uninsured or have low insurance, ask yourself this question: "IN WHAT FINANCIAL CONDITION WOULD THE TOTAL DESTRUCTION OF MY STOCK AND BUSINESS PROPERTY LEAVE ME?" Should the answer be unsatisfactory, take out adequate insurance, and you will sleep better and strengthen your commercial standing.

We have facilities for gaining information as to most stock insurance companies and shall be glad to answer inquiries from our customers as to the standing of any one of them.

WE CONSTANTLY CARRY AN INSURANCE OF OVER NINETY PER CENT. OF THE VALUE OF OUR MERCHANDISE.
